PROCEEDINGS

1  
2 CHAIR RUBALCAVA: Good morning, everybody. We're  
3 calling the -- I'm calling the Pension and Health Benefits  
4 Committee to order and the first order of business is roll  
5 call, please.

6 BOARD CLERK ANDERSON: Ramón Rubcalava.

7 CHAIR RUBALCAVA: Present.

8 BOARD CLERK ANDERSON: Kevin Palkki.

9 VICE CHAIR PALKKI: Good morning.

10 BOARD CLERK ANDERSON: Malia Cohen.

11 David Miller.

12 Eraina Ortega.

13 COMMITTEE MEMBER ORTEGA: Here.

14 BOARD CLERK ANDERSON: Jose Luis Pacheco.

15 COMMITTEE MEMBER PACHECO: Present.

16 BOARD CLERK ANDERSON: Theresa Taylor.

17 COMMITTEE MEMBER TAYLOR: Here.

18 BOARD CLERK ANDERSON: Yvonne Walker.

19 CHAIR RUBALCAVA: I see her on the screen. Can  
20 you hear us, Yvonne?

21 BOARD CLERK ANDERSON: Yvonne Walker.

22 COMMITTEE MEMBER TAYLOR: Wave. Maybe she can  
23 wave.

24 COMMITTEE MEMBER WALKER: (Waved).

25 CHAIR RUBALCAVA: Yeah, she waved. Okay. Then

1 we'll take that as a present.

2 BOARD CLERK ANDERSON: Mullissa Willette.

3 COMMITTEE MEMBER WILLETTE: Here.

4 CHAIR RUBALCAVA: Thank you.

5 Now, that we've completed roll call, we will  
6 recess into closed session for items 1 through 4 from the  
7 closed session agenda. We'll reconvene in open session  
8 after we break for lunch approximately 1 o'clock.

9 Thank you, everybody.

10 (Off record: 8:31 a.m.)

11 (Thereupon the meeting recessed  
12 into closed session.)

13 (Thereupon the meeting reconvened  
14 open session.)

15 (On record: 12:45 p.m.)

16 CHAIR RUBALCAVA: Good afternoon, everybody.

17 Welcome to the Pension and Health Benefits Committee.

18 Okay. We're back in open session and we'll continue the  
19 remainder of the open session agenda.

20 Please call the roll.

21 BOARD CLERK ANDERSON: Ramón Rubalcava.

22 CHAIR RUBALCAVA: Present.

23 BOARD CLERK ANDERSON: Kevin Palkki.

24 VICE CHAIR PALKKI: Good afternoon.

25 BOARD CLERK ANDERSON: Debora Gallegos.

1           ACTING COMMITTEE MEMBER GALLEGOS: Here.

2           BOARD CLERK ANDERSON: David Miller.

3           COMMITTEE MEMBER MILLER: Here.

4           BOARD CLERK ANDERSON: Eraina Ortega.

5           COMMITTEE MEMBER ORTEGA: Here.

6           BOARD CLERK ANDERSON: Jose Luis Pacheco.

7           COMMITTEE MEMBER PACHECO: Present.

8           BOARD CLERK ANDERSON: Theresa Taylor.

9           COMMITTEE MEMBER TAYLOR: Here.

10          BOARD CLERK ANDERSON: Yvonne Walker.

11          COMMITTEE MEMBER WALKER: Here.

12          BOARD CLERK ANDERSON: Mullissa Willette.

13          COMMITTEE MEMBER WILLETTE: Here.

14          CHAIR RUBALCAVA: Good afternoon, Board members.

15 because we are not all present in the same room and Board  
16 member are participating from promote locations that are  
17 no accessible to the public, Bagley-Keene requires the  
18 remote Board members to make certain disclosures about any  
19 other persons present with them during open session.

20 Accordingly, the Board members participating remotely must  
21 each attatch[sic] either that, one, they are alone, or  
22 two, there is -- there are one or more persons present  
23 with them who are at least 18 years old and the nature of  
24 the Board member's relationship to each person.

25           At this time, I will ask each remote member to

1 verbally attest accordingly. Please conduct the roll call  
2 attestation.

3 BOARD CLERK ANDERSON: Yvonne Walker.

4 COMMITTEE MEMBER WALKER: I attest that I'm  
5 alone.

6 BOARD CLERK ANDERSON: Dr. Gail Willis.

7 BOARD MEMBER WILLIS: I attesst that I'm alone.

8 BOARD CLERK ANDERSON: And Lisa Middleton.

9 CHAIR RUBALCAVA: You're muted, Lisa.

10 BOARD MEMBER MIDDLETON: My apologies. I do so  
11 attest.

12 CHAIR RUBALCAVA: Thank you, everybody. So now  
13 we'll proceed with the agenda starting with the executive  
14 report from Don Moulds and Kim Malm.

15 DEPUTY EXECUTIVE OFFICER MALM: Good afternoon,  
16 Mr. Chair and members of the Pension and Benefits Health  
17 Committee[sic]. Kim Malm, CalPERS team member.

18 I'm going to start this morning by introducing  
19 Brad Hanson. He's been pointed as the new Division Chief  
20 over the Employer Account Management Division and replaces  
21 Renee Ostrander. In his new role, Brad will oversee all  
22 customer service and support functions to our employer  
23 partners to ensure timely, accurate, and compliant  
24 reporting. Brad has worked for CalPERS for 25 years,  
25 including the Assistant Division Chief in EAMD and in

1 CEOOD, or our Customer Education and Outreach Division. So  
2 I'd just like to welcome Brad to the team in your new role  
3 as a Division Chief.

4 (Applause).

5 DEPUTY EXECUTIVE OFFICER MALM: He's going to  
6 have to sneak out of here soon. He's got an interview  
7 panel that he has to sit on.

8 But I'll move on now to our Benefit Verification  
9 Project. As you're aware, we mailed over 8,100 letters to  
10 members on March 28th to retirees asking them to verify  
11 that they're still eligible for benefits. From those  
12 8,100 letters, we've received responses from 91 percent of  
13 these members. There were 108 deaths reported. The  
14 average number of days since passing was 44 days. There  
15 were four that were over a year old. About half the  
16 deaths were reported in California. The remainder were  
17 spread across 15 other states.

18 On May 10th, we mailed over 1,600 letters to  
19 those that had not responded by the due date of April  
20 26th. The second letter requested immediate response or  
21 their August 1st benefit payment would be held. We've  
22 performed a phone call an email campaign and have either  
23 called or emailed all those that are still outstanding.  
24 We have about a hundred that came back with undeliverable  
25 addresses.

1           To date, we still have not received documentation  
2 from about 700 members. The due date was yesterday. So  
3 for those that we have not heard from, we are placing  
4 their monthly benefits on hold. Again, this would impact  
5 their August 1st benefit payment.

6           For the 108 deaths found, we have stopped the  
7 benefit payment and began the overpayment collection  
8 process. The deaths resulted in over \$1 million in  
9 overpayments, of which we've been successful in collecting  
10 over 600,000, or about 62 percent. For the remaining  
11 overpayments, we are attempting recovery from banks, sent  
12 the estate notification of the overpayment, and are  
13 researching liable parties to collect from. We've also  
14 engage FINO on the larger overpayments to assist with  
15 further collection activities, such as phone calls,  
16 additional letters, and FTB intercepts. We'll be sending  
17 legal the latest list of large overpayments where fraud is  
18 suspected.

19           We are looking forward to being able to utilize  
20 Socure, our death verification vendor soon. They expect  
21 full approval from the federal government's final approval  
22 of their completed submission this summer. As a reminder,  
23 they are already StateRAMP approved.

24           I will continue to keep the Board updated on our  
25 efforts with this project. Moving on to other news, our

1 team, in coordination with Public Affairs, have produced  
2 and posted video version of our Planning Your Retirement  
3 basics class in Spanish. This was posted online on May  
4 22nd and can be found in our CalPERS YouTube channel and  
5 also accessed through our CalPERS website. We promoted  
6 this in our PERSpective and member news email. We'll be  
7 notifying employers and asking them to share it with their  
8 teams. We've also created a QR code to video that we're  
9 using at events and in the regional offices.

10 As a reminder, we just had our CBEE in San Luis  
11 Obispo this last weekend. We had a total 537 attendees at  
12 the CBEE. During the event, the team helped retire three  
13 people and provided assistance to a couple of members in  
14 Spanish. Members mentioned that they were very  
15 appreciative of the Spanish video we promoted. Our next  
16 CBEE is going to be in Sacramento on July 12th and 13th.

17 Lastly, we'll be hosting a virtual class on  
18 Funding Your Retirement Future on June 26th and 27th. We  
19 partnered with CalHR and Social Security to present the  
20 three legged stool of retirement planning. Those that  
21 participate will learn how the CalPERS pension, Social  
22 Security, and the member's own personal savings funds will  
23 help them prepare for financially for retirement. That  
24 concludes my report, Mr. Chair and I'm happy to answer any  
25 questions.

1 CHAIR RUBALCAVA: Thank you. Any questions from  
2 the committee?

3 Seeing none, I will proceed with Ms. -- sorry.  
4 We do have a question.

5 Trustee Pacheco, please.

6 COMMITTEE MEMBER PACHECO: Yes. Thank you, Ms.  
7 Malm, for your comments.

8 DEPUTY EXECUTIVE OFFICER MALM: Um-hmm.

9 COMMITTEE MEMBER PACHECO: I'd like to just go  
10 back to the letters that you mentioned. You mentioned  
11 that there were several that were suspected of fraud. And  
12 I'm wondering what is the process? Does -- how does --  
13 when -- if you suspect fraud in one of the -- in the  
14 collection process.

15 DEPUTY EXECUTIVE OFFICER MALM: It goes over to  
16 our Legal Office and the Investigations Office and they do  
17 an investigation to see like who the liable party would  
18 be. And then depending upon the ability to collect the  
19 fraud or prove the fraud, it would have to be a big enough  
20 number in order to do something about that, then the Legal  
21 Office or Investigation Office pursues that.

22 COMMITTEE MEMBER PACHECO: Okay.

23 DEPUTY EXECUTIVE OFFICER MALM: Customer Services  
24 not --

25 COMMITTEE MEMBER PACHECO: Okay. Very Good.

1 Thank you. That's all my questions, sir. Thank you.

2 CHAIR RUBALCAVA: Thank you.

3 Mr. Don Moulds.

4 CHIEF HEALTH DIRECTOR MOULDS: Great. Thanks.

5 Good afternoon, Mr. Chair, and members of the Committee.

6 We have a full afternoon ahead of us, so I'd like to keep  
7 this relatively short. We have three important topics on  
8 the agenda today, rates, our PPO solicitation, and the  
9 Long-Term Care Program. Rates were challenging this year.  
10 While our HMO rates look much more like they have in  
11 previous years, beating national benchmarks for medical  
12 inflation, we continue to see high PPO rates as we  
13 stabilize that product.

14 Medicare rates are also extremely high this year  
15 due to significant changes in the Inflation Reduction Act  
16 and the way CMS reimburses employer plans. Those changes  
17 are good for Medicare beneficiaries, particularly those  
18 who depend on high-cost specialty drugs, but they add  
19 significant new costs for plan sponsors like CalPERS.

20 We are very excited to bring you the product of  
21 our PPO solicitation, which I believe will be a model for  
22 the nation. It creates broad financial alignment between  
23 CalPERS and our new third-party administrator that will  
24 lower costs and drive quality improvement. We're also  
25 proposing adding a population health management vendor

1 that will help members find the right care and the right  
2 providers at the right time. If we -- it will help  
3 members with complex health conditions receive more  
4 coordinated care and achieve better outcomes as well.

5           The PPO proposal is notable -- is also notable  
6 for what it doesn't do. It doesn't cut benefits and it  
7 doesn't increase cost sharing. Too often, purchasers rely  
8 on those two strategies in the name of efficiency. By  
9 instead leaning into accountability and better more  
10 coordinated care, we're bucking a national trend that has  
11 been making health care less comprehensive and harder to  
12 afford.

13           Next, I want to call your attention to a new --  
14 to newly published research from the National Quality  
15 Forum and Health Affairs authored by our strategic  
16 consultant Peter Lee on lives saved by improved  
17 performance on particular quality measures. The article  
18 measures the impact in lives saved and harms avoided if we  
19 improve health plan clinical performance by putting in  
20 place major financial incentives focused on a few  
21 high-value health care areas. It was inspired by the  
22 quality incentive alignment work we have been doing with  
23 Covered California and the Department of Health Care  
24 Services.

25           What the research shows is striking. It's

1 estimated that colorectal cancer and hypertension cause  
2 approximately 52,000 and 691,000 annual deaths  
3 respectively in the U.S. If health plans improved  
4 performance by reaching the 66th percentile on just these  
5 two quality measures, the same level that is now required  
6 in our HMO contract and that we're proposing today to add  
7 to our PPO contract, it would result in 34,000 fewer  
8 deaths for colorectal cancer and 110,000 fewer  
9 hypertension deaths over the next 10 years.

10 Translated to our own CalPERS population, this  
11 would mean roughly 600 members' lives could be saved. To  
12 me, this affirms that through thoughtful performance  
13 measurement and meaningful incentives set forth in our  
14 quality alignment measure set and alignment with our  
15 statewide purchaser partners, we can improve quality  
16 advance health equity, and ultimately save lives of  
17 thousands of Californians.

18 To this end, we want to let you know that CalPERS  
19 has been accepted to become a member of the National  
20 Quality Forum. This is a national community of  
21 influential stakeholders and thought leaders that help  
22 shape the future of health care quality and high  
23 standards. Our membership will allow us to continue  
24 influencing quality improvement policies and measures at  
25 the national level. We will serve on national advisory

1   councils and technical expert panels, which will allow us  
2   to contribute to and learn from a national community.

3           That concludes my remarks. The team and I look  
4   forward to a great discussion as we dig into the important  
5   topics that we have before you today.

6           CHAIR RUBALCAVA: Thank you. And congratulation  
7   on your work that allowed us, CalPERS, to be invited to a  
8   national forum of that stature. Thank you.

9           Okay. Why don't we continue to the action  
10   consent items. I'll entertain a motion for approval.

11          COMMITTEE MEMBER PACHECO: I'll move.

12          COMMITTEE MEMBER MILLER: Second.

13          CHAIR RUBALCAVA: So Mr. Pacheco moves and Mr.  
14   Miller seconds.

15          Let's call for the vote.

16          BOARD CLERK ANDERSON: Kevin Palkki?

17          VICE CHAIR PALKKI: Aye.

18          BOARD CLERK ANDERSON: Deborah Gallegos?

19          ACTING COMMITTEE MEMBER GALLEGOS: Aye.

20          BOARD CLERK ANDERSON: David Miller?

21          COMMITTEE MEMBER MILLER: Aye.

22          BOARD CLERK ANDERSON: Eraina Ortega?

23          COMMITTEE MEMBER ORTEGA: Aye.

24          BOARD CLERK ANDERSON: Jose Luis Pacheco?

25          COMMITTEE MEMBER PACHECO: Aye.

1 BOARD CLERK ANDERSON: Theresa Taylor?

2 COMMITTEE MEMBER TAYLOR: Aye.

3 BOARD CLERK ANDERSON: Yvonne Walker?

4 COMMITTEE MEMBER WALKER: Aye.

5 BOARD CLERK ANDERSON: Mullissa Willette?

6 COMMITTEE MEMBER WILLETTE: Aye.

7 CHAIR RUBALCAVA: Okay. The ayes have it. Thank  
8 you.

9 So now, we'll proceed to item number 4, which is  
10 information consent items. I have no requests to hold  
11 anything, so we'll move on to the action item, Don and Mr.  
12 Rob.

13 (Thereupon a slide presentation).

14 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

15 JARZOMBEK: Okay. Good afternoon.

16 CHAIR RUBALCAVA: The action item, of course, is  
17 PPO solicitation, third-party solicitation.

18 Thank you.

19 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

20 JARZOMBEK: Good afternoon, Mr. Chair and members of the  
21 Committee. Rob Jarzombek CalPERS team member.

22 This is an action item where we are seeking your  
23 approval for the intent to award the third-party  
24 administrator and population health management vendor for  
25 the next PPO contract. As you know, we started this

1 journey last summer and the culmination of the team's  
2 thoughtful and hard work is here with our recommendation  
3 for the next PPO -- for the next five-year contracts.

4 Let's get started.

5 [SLIDE CHANGE]

6 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

7 JARZOMBK: Here is today's agenda. We will go over the  
8 timeline and objectives, share what firms participated in  
9 this very competitive solicitation, and provide our  
10 recommendation and why we are recommending those firms.

11 We will explain the transformative performance  
12 guarantees we are able to secure and talk through  
13 continuity and access strategies for members.

14 [SLIDE CHANGE]

15 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

16 JARZOMBK: Here's a quick look at the timeline. We have  
17 completed competitive negotiations and are pleased to  
18 share our recommendation for the intent to award the PPO  
19 contract. Once you take action, we will finalize the  
20 premiums with the firms before we approve them at the July  
21 off-site. Your approval of the intent to award the  
22 contract today will allow us to fully begin all  
23 implementation activities with the selected entities, so  
24 there will be a smooth transition going into 2025. This  
25 includes having a population health management vendor on

1 board to assist PPO members during open enrollment that  
2 starts in September.

3 [SLIDE CHANGE]

4 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

5 JARZOMBK: Here are the objectives we have with the  
6 solicitation. And we're happy to report we were able to  
7 meet all of them. On the financial side, we sought  
8 stability and financial alignment between CalPERS and the  
9 firms we contract with. We wanted to work with partners  
10 that can give us the lowest possible trend and total cost.  
11 And this is not just for 2025, but for over the entire  
12 five-year period of the contract, 2025 through 2029.

13 On the quality side, you're aware that we have  
14 dramatically raised the bar with our HMOs. Our goal is to  
15 have CalPERS PPOs be as quality and equity centered as our  
16 HMOs, so we are using the same quality alignment measure  
17 set and benchmarks that we do for the HMOs.

18 We are also requiring there be substantial  
19 guarantees on the part of the firms to meet those targets.  
20 Additionally, we want the health plan to work with us to  
21 achieve our goals for advanced primary care, which include  
22 integrating behavioral health into primary care, using a  
23 team-based approach to care, and ensuring referrals are  
24 made to high quality specialists.

25 And for the population health management

1 services, we want to better -- we want a way to better  
2 support our members in the PPO environment, find high  
3 value clinicians, and get the care, management, and  
4 coordination that they need. This is a gap with most  
5 PPOs, including hours, and we want to address it moving  
6 forward. That said, our members will still have the  
7 freedom to see a specialist without a referral. But for  
8 those who would like additional support, it is there for  
9 them in the form of care navigation and care management  
10 services.

11 We think this will help improve the member  
12 experience and also improve member outcomes. And for our  
13 most complex high needs members, such as those with  
14 multiple chronic conditions, a population health  
15 management vendor will help coordinate the care they need  
16 to achieve better outcomes.

17 [SLIDE CHANGE]

18 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

19 JARZOMBK: Because population health management services  
20 may be a new concept for many, I'd like to talk a little  
21 bit about it here. A population health management vendor  
22 is there to assist members during their entire continuum  
23 of care. Starting at the left, those services could be on  
24 the administrative side, so helping a member navigate the  
25 benefit structure or simply understanding a bill they

1 receive.

2           It also includes assisting a parent with a sick  
3 child, find urgent care options, or help a member find a  
4 provider. The population health management vendor can  
5 also assist a member looking for a therapist with whom  
6 they can identify culturally or have a similar background.  
7 Finally, as mentioned before, the population health  
8 management vendor provides complex case management for our  
9 members with serious conditions, which will help ensure  
10 their care is coordinated.

11           So population health management is really a wide  
12 suite of services, including providing assistance,  
13 improving the access to care for members and ensuring the  
14 care delivery that is happening is of high quality and  
15 coordinated, especially for our sickest members.

16                                 [SLIDE CHANGE]

17                                 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

18 JARZOMBЕК: Moving on to the firms. We received bids from  
19 two third-party administrators, Anthem Blue Cross and Blue  
20 Shield of California. We also received bids from three  
21 population health management vendors, Accolade, Included  
22 Health, and Quantum Health and Premise Health, which was a  
23 joint venture.

24           Each of these firms not only submitted strong  
25 original bids, but also improved them as we went through

1 the competitive process. This is good news as we had very  
2 strong choices representing significant improvements to --  
3 for our members. I'd like to thank all five firms for  
4 their very strong proposals that made this solicitation  
5 very competitive.

6 [SLIDE CHANGE]

7 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

8 JARZOMBK: Today, we are pleased to present our  
9 recommendation. We recommend Blue Shield of California as  
10 the third-party administrator for our PPOs in a  
11 self-insured arrangement and a separate direct contract  
12 with Included Health to provide population health  
13 management services. While CalPERS will have two separate  
14 contracts, services will be coordinated so their delivery  
15 will be seamless to members. The advantage of having two  
16 separate contracts gives us more oversight of the services  
17 being provided, great insight into each entity's  
18 performance, and creates more accountability for the  
19 firms.

20 As an alternative, we have Option 2. Option 2 is  
21 to extend the current Anthem contract for one year and  
22 bring on Included Health in 2025 to provide population  
23 health management services to members. The Blue Shield  
24 third-party -- third-party administrator contract would  
25 start in 2026. This delayed start date would give Blue

1 Shield additional time to add more clinicians to their  
2 network with the goal of reducing member disruption.

3 I'll now talk through why we recommend Blue  
4 Shield and Included Health.

5 [SLIDE CHANGE]

6 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

7 JARZOMBK: So why Blue Shield? First and foremost, Blue  
8 Shield has strong strategic alignment with CalPERS. They  
9 also have total alignment on the transformative  
10 performance guarantees we have for cost and quality. We  
11 have secured significant performance guarantees with them,  
12 which we think will drive delivery system change.

13 As mentioned earlier, they have agreed to use the  
14 new quality measures that we added to our HMO contracts,  
15 which we help -- which will help improve outcomes for PPO  
16 members in the coming years. Additionally, their provider  
17 network structure allows to us partner on cost containment  
18 strategies as well as quality improvement efforts.

19 Regarding Blue Shield's networks, Blue Shield has  
20 committed to ensuring that the network continues to be  
21 sufficient and will have processes to evaluate and adjust  
22 this moving forward.

23 [SLIDE CHANGE]

24 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

25 JARZOMBK: For similar reasons, we are also recommending

1 Included Health. Included's -- Included Health stood out  
2 as a strategically aligned organization that is eager to  
3 partner with CalPERS. They provide best-in-class member  
4 navigation and care management services, and they were the  
5 most quality and equity focused firm in the solicitation.

6 Included Health also has total alignment on the  
7 transformative performance guarantees we have for cost and  
8 quality with both CalPERS and Blue Shield. They have  
9 agreed to the same set of measures and how they're held  
10 accountable to them. This is an important commitment as  
11 it demonstrates their belief that their model of care  
12 management will have meaningful impacts to our members.

13 For basic members, Included Health will become  
14 the point of contact for all member service functions. So  
15 the phone number on the back of the -- back of a basic  
16 member -- basic member's ID card will go to Included  
17 Health. This creates the opportunity for Included Health  
18 to help members find the care they need, including finding  
19 a high quality clinician and even scheduling an  
20 appointment for them. It also helps members find the care  
21 management services for those high cost and high use  
22 members who need the additional support, so all the things  
23 I mentioned earlier.

24 Also, Included Health will provide a supplemental  
25 virtual health network for both primary care and

1 behavioral health services. This network will serve as a  
2 bridge to help members access a clinician virtually should  
3 they be unable to schedule a timely appointment with their  
4 in-person clinician or unable to find a new primary care  
5 or behavioral health clinician.

6 [SLIDE CHANGE]

7 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

8 JARZOMBK: Before going into the performance measures,  
9 I'd to briefly explain the impacts to Medicare  
10 supplemental members, as they are different from the  
11 changes Basic members will experience with the new  
12 contracts. It's very important to note that when we talk  
13 about network changes in a couple of slides, those are for  
14 Basic members only. A Medicare supplement member's access  
15 to their providers is not changing, as the Medicare  
16 network itself is unchanged. A Medicare supplement  
17 member's access to providers is not impacted by a change  
18 of the third-party administrator.

19 Next, care coordination that Medicare supplement  
20 members receive to day will continue with no changes.  
21 This is because that care coordination is covered by CMS  
22 and is already being provided by clinicians for members.  
23 What is changing for Medicare supplement members is the  
24 third-party administrator. So any administrative services  
25 our Medicare members receive today from Anthem, such as

1 help understanding a bill or working to have a bill paid  
2 and the Medicare member reimbursed, those would go through  
3 the new third-party administrator Blue Shield.

4           That said, we'd like to explore areas where  
5 additional population health management services would be  
6 appropriate, but not duplicative of what CMS currently  
7 provides. Both Blue Shield and Included Health are  
8 looking forward to working with us on this and will keep  
9 everyone informed as we continue to explore a possible  
10 partnership.

11   [SLIDE CHANGE]

12   HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

13 JARZOMBK: Turning now to the performance guarantees.  
14 With this five-year contract, Blue Shield and Included  
15 Health have aligned financial objectives with CalPERS  
16 priorities and have agreed to identical contract terms.

17           Both Blue Shield and Included Health are putting  
18 75 percent of their fees at risk for controlling cost and  
19 improving quality. Together, this amounts to over \$464  
20 million at risk over the five-year contract period for  
21 meeting high-bar targets, with upside potential or gain  
22 sharing if the actual trend is significantly better than  
23 projected.

24           The total cost of care benchmark for the first  
25 year is 5.5 percent with a target trend going down each

1 year to reach three percent by 2029. This three percent  
2 target is substantially lower than CalPERS current trend  
3 and aligns with the trend benchpark recently by the  
4 California Office of Health Care Affordability.

5 For quality, as we've mentioned previously, both  
6 Blue Shield and Included Health have agreed to using the  
7 same quality alignment measure set and benchmarks that we  
8 use in the HMO contracts. We will have the same high  
9 quality and equity standards for all Basic members  
10 regardless if they are in an HMO or a PPO. The alignment  
11 that we've been able to achieve in these arrangements and  
12 the dollars at stake for both Blue Shield and Included  
13 Health are groundbreaking.

14 [SLIDE CHANGE]

15 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

16 JARZOMBEC: Let's now talk about networks, and  
17 particularly about how we're going to ensure that our  
18 members have a smooth transition for our current network  
19 to Blue Shield's.

20 First, for Platinum, which as you know is a very  
21 broad network. As this slide illustrates, Blue Shield's  
22 proposed Platinum network is very comparable to our  
23 Platinum network today, though with somewhat fewer primary  
24 care specialists and behavioral health clinicians.  
25 Generally, both networks cover the same hospitals,

1 facilities, and systems. However, this does not mean  
2 there is universal overlap. Therefore, Blue Shield will  
3 implement targeted strategies to achieve near universal  
4 overlap, which I'll walk through on the next slide.

5 [SLIDE CHANGE]

6 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

7 JARZOMBK: This slide shows the estimated member  
8 continuity in Platinum with an existing in-network  
9 provider. Our estimates of what it looks like now are on  
10 the left and the vast majority of our members who get care  
11 would have the same doctors in network. This is about 87  
12 percent of PCPs and specialists and about 84 percent of  
13 behavior health clinicians. I'll note that not included  
14 in these numbers is the approximate 3,300 Platinum members  
15 who are not receiving any medical care. This is roughly  
16 three percent of the entire enrollment. Therefore,  
17 there's no disruption for members who have not sought  
18 medical services.

19 Between now and January, Blue Shield will add  
20 clinicians in the Platinum network to get to the point of  
21 near universal continuity. The goal here is to ensure our  
22 members can stay with the same clinician without doing  
23 anything. However, as you can see, this still leaves  
24 about 4,200 potential members without an existing  
25 in-network clinician starting in 2025. For this

1 population, we are applying the DMHC continuity of care  
2 standards that are required for HMOs to our PPOs. These  
3 provisions would allow certain members to remain with  
4 their existing clinician for up to one year. For the  
5 members who are not eligible for DMHC's continuity of care  
6 provisions, Blue Shield will provide a one-year  
7 out-of-network exception for office visits. This will  
8 allow members to continue to see their clinicians while  
9 Blue Shield -- Blue Shield can either add them to the  
10 network or Included Health can help a member find a new  
11 in-network clinician. Bottom line is that we are seeking  
12 near universal continuity for all Platinum members.

13 [SLIDE CHANGE]

14 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

15 JARZOMBK: Switching to the Gold network. Again, as with  
16 Platinum, in general, the current Gold network and Blue  
17 Shield's proposed Gold network both cover the same  
18 hospitals, facilities, and systems. However, Blue  
19 Shield's proposed Gold -- proposed Gold network is not as  
20 large as what we currently have. To address this, Blue  
21 Shield will implement targeted strategies for Gold members  
22 to ensure ongoing adequacy and network quality for our  
23 members.

24 [SLIDE CHANGE]

25 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

1 JARZOMBEC: Right now, we estimate about 85 percent of  
2 Gold members will be able to continue to see their PCP,  
3 specialist, or behavioral health clinician in Blue  
4 Shield's proposed Gold network. Blue Shield has also  
5 committed to increasing clinicians in this network by  
6 January to achieve an approximate 90 percent continuity  
7 level for members. This leaves about 10 percent of Gold  
8 members who saw a clinician potentially disrupted, which  
9 is about 9,300 members.

10           However, when compared to all Gold members, not  
11 just those who saw a clinician, the percentage of  
12 disruption drops to 6.9 percent. This is because there  
13 are about three percent of Gold members, similar to the  
14 Platinum side, who are not receiving any medical care.  
15 Therefore, there's no disruption for the members who have  
16 not sought medical services.

17           For the Gold members who will be disrupted,  
18 here's the strategy to address continuity for them. Gold  
19 members living in 22 rural counties, which are typically  
20 areas that do not have a low-cost HMO option available,  
21 these members will have the same continuity of care and  
22 out-of-network benefits as Platinum members, meaning  
23 members who qualify for a DMHC's continuity of care  
24 provisions will go through that process, and for others,  
25 Blue Shield will provide a one-year out-of-network

1 exception for office visits.

2 This will allow members to continue to see their  
3 clinicians, while Blue Shield can either add them to the  
4 network or Included Health will help the member find a new  
5 in-network clinician. There are approximately 1,300  
6 members in this category.

7 For our members in urban and suburban areas,  
8 where we typically offer a wide array of choices, if those  
9 members prefer to keep their current clinician, they can  
10 use CalPERS health plan search tool in their myCalPERS  
11 account to find which other health plans their doctor  
12 accepts. Our estimates show that about 30 percent of  
13 members could switch to a similarly or lower priced HMO to  
14 keep their current clinician, and just over 60 percent of  
15 members could switch to Platinum to keep their current  
16 clinician.

17 And, of course, thanks to the new population  
18 health management vendor, Included Health, all basic PPO  
19 members, whether they have continuity with a clinician or  
20 not, can obtain assistance from Included Health to help  
21 them find a new in-network clinician. This personalized  
22 support will be critically important for those members  
23 wanting to connect with a quality in-network clinician.

24 [SLIDE CHANGE]

25 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

1 JARZOMBEK: I'd like to talk now about what we propose to  
2 have in place with these new contracts that go beyond  
3 continuity and really address concerns about adequacy,  
4 access, and quality of these new networks. We recommend  
5 bringing on Included Health in September 2024 in advance  
6 of the new third-party administrator contract to help  
7 members find clinicians they need. This is important to  
8 help members confirm their clinician will still be in  
9 network the next year, and if not, help members find a new  
10 one. We think this will help improve the member  
11 experience and also improve member outcomes, as quality  
12 clinicians can better address gaps in care.

13           Next, we are adding supplemental virtual primary  
14 care and behavioral health services. This can serve as a  
15 safety valve to help members get the access to care they  
16 need when they need it. Yet, even as a safety valve,  
17 Included Health will have their virtual primary care  
18 program support and complement the existing primary care  
19 clinicians, if a member has them and not simply replace  
20 in-person doctors. This reflects our believe that access  
21 to in-person continuous advanced primary care is  
22 foundational to our quality and equity goals.

23           In the new third-party administrator contract, we  
24 have added requirements not only to ensure network quality  
25 and adequacy, but also drive our third-party administrator

1 to achieve higher network access and capacity standards.  
2 These requirements, which align with requirements in our  
3 HMO contracts, stipulate that all participating providers  
4 are held to quality, equity, safety, and affordability  
5 standards.

6 To assess network adequacy and ensure Blue  
7 Shield's networks meet our high standards for access,  
8 CalPERS will conduct independent and timely access  
9 surveys, known as secret shopper surveys. These surveys  
10 will be done on Blue Shield's behavioral and physical  
11 health networks for the duration of the contract. These  
12 surveys provide the best picture of the state of provider  
13 accessibility and accuracy of provider directories. It  
14 will give us real-time insight into what is happening on  
15 the ground and allow CalPERS to take timely steps to  
16 address it.

17 [SLIDE CHANGE]

18 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF  
19 JARZOMBK: Here are the pros and cons of each option. We  
20 recommend moving forward with Blue Shield and Included  
21 Health in 2025. That is Option 1. This is because we  
22 have very strong contract terms now and waiting an  
23 additional year for them to start could create an  
24 opportunity for those terms to change and become less  
25 favorable to CalPERS.

1 More importantly, we want to be able to deliver  
2 this product to our members now and ensure we have the  
3 total cost of care and quality guarantees in place as soon  
4 as we can.

5 [SLIDE CHANGE]

6 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

7 JARZOMBK: For the proposed next steps, with the Board's  
8 action, we will accelerate our implementation activities  
9 with the selected firms and work to finalize contracts.  
10 We will begin transition activities immediately and start  
11 the population health management contract ahead of open  
12 enrollment, so Included Health can be on board to help  
13 members make an informed decision during the open  
14 enrollment period.

15 The new third-party administrator contract would,  
16 of course, start on January 1st 2025. And finally, a  
17 smooth Transition for our members is central to the work  
18 we have to do in the next several months. We realize that  
19 change can be difficult and many of our PPO members have  
20 had Anthem as their PPO health plan for a very long time.  
21 For these reasons, we will work closely with Blue Shield,  
22 Included Health, and Anthem on a thorough communication  
23 plan to ensure that our members receive clear regular  
24 communications about the changes they should expect to see  
25 on how they are impacted. This includes our presentation

1 and we're happy to answer any questions.

2 CHAIR RUBALCAVA: Thank you very much for all  
3 that work land a great presentation. I will now entertain  
4 comments and questions from the trustees. We'll start  
5 with President Taylor.

6 COMMITTEE MEMBER TAYLOR: So I was actually  
7 putting mine on to make the motion. So I'm going to wait  
8 and let everybody talk, so --

9 CHAIR RUBALCAVA: Okay. Thank you. We'll have  
10 Mr. Pacheco next.

11 COMMITTEE MEMBER PACHECO: Yes. Thank you,  
12 Chairman Rubalcava and thank you, Rob, for your  
13 presentation. I really appreciate all that you've done as  
14 well as your team on this effort. It's been a -- it's  
15 been a long and very good material. And I just want to  
16 thank you for all the work you -- all the good work you're  
17 doing.

18 My first question is regarding the Included  
19 Health care -- Included Health in terms of the provision  
20 that we passed I guess back in November with the doula  
21 feature, and how that will be incorporated with respect to  
22 the Include[sic] Health and the basic -- for the basic  
23 members.

24 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF  
25 JARZOMBK: Sure. So the doula benefit that you voted on

1 last November to add that benefit to the 2025 plans, that  
2 will be handled by the health plans because it's a medical  
3 benefit. So with that, that will all -- it will -- that  
4 will all go on the medical side. However, Included Health  
5 will be aware of that and all of the benefit design  
6 changes, as well as just the benefit structure of the  
7 PPOs. And so they will be able to inform that member who  
8 is -- who's going through a pregnancy and may benefit from  
9 a doula. So it won't happen -- Included Health will not  
10 provide that service, but they will be connect the member  
11 with the appropriate doula to help that member through  
12 their pregnancy.

13 We have Dr. Lisa Albers here who can a little bit  
14 more color to that on when that is appropriate for the --  
15 for that doula benefit to kick in.

16 MEDICAL CONSULTANT II ALBERS: Thanks. Good  
17 afternoon, Mr. Chairman and members of the Committee.  
18 Lisa Albers, CalPERS team member. Rob actually said it  
19 perfectly. That's how it will work. Included Health will  
20 be made aware of the benefit and we'll be able to direct  
21 members -- pregnant members, who are in need of doula  
22 services, to the appropriate doula provider, either  
23 with -- working with the TPA, the third-party  
24 administrator, or simply because they have that direct  
25 contact with the doula providers. We have also instructed

1 our health plans to outreach to members who are at higher  
2 risk of pregnancy complications, perhaps because of their  
3 race and ethnicity, and so Included Health will be aware  
4 of this information as well and will be expected to also  
5 make those members aware of this benefit.

6 COMMITTEE MEMBER PACHECO: And with respect to  
7 the identifying of members, members that have, like for  
8 instance, gestational diabetes or eclampsia, issues of  
9 those natures, the high-risk pregnancies.

10 MEDICAL CONSULTANT II ALBERS: Yes. Part of what  
11 Included Health will do as the population health  
12 management vendor, is that they will look at each of the  
13 members. They will look at claims information, medical  
14 and pharmacy claims, they will look at electronic health  
15 records, they will look at standard assessments, and then  
16 they will determine if there are members, including  
17 pregnant members, that are in need of additional support  
18 services or additional care management services.  
19 Additionally, members can always reach out to the  
20 population health management vendor on their own looking  
21 for those services or providers can refer them as well.  
22 So there are multiple ways to identify members who might  
23 be in need of additional services.

24 COMMITTEE MEMBER PACHECO: But the Include[sic]  
25 Health would be basically kind of navigating the process,

1 is that's my -- that's my -- I'm trying -- that's my  
2 understanding.

3 MEDICAL CONSULTANT II ALBERS: Yes. I'm sorry.  
4 That's absolutely true. They will be the prime navigator,  
5 if you will, to direct the member to the appropriate  
6 services.

7 COMMITTEE MEMBER PACHECO: Okay. Very good. And  
8 my last question is if we do approve this, what is the  
9 timeline and communication communicating out all this  
10 information.

11 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF  
12 JARZOMBEK: So for communications, what we are going to --  
13 we, will -- we, CalPERS, will send our own letters to  
14 members. This is part of our standard process we've had  
15 for several years now informing members in advance of open  
16 enrollment about significant changes happening, whether  
17 it's the removal of a health plan or significant premium  
18 changes. This would definitely be part of what we want to  
19 communicate to them, the change in the -- potential change  
20 in the third-party administrator and the addition of a  
21 population health management vendor.

22 Blue Shield and Included Health will also perform  
23 some outreach activities to members informing them of the  
24 change and the switch. And so members will receive  
25 multiple communications from -- meaning each -- at least

1 one from all three of us to ensure they are aware of  
2 the -- of the change. We're also committed to providing  
3 additional outreach to members. As part of our open  
4 enrollment process, we do webinars, we do articles for  
5 retiree stakeholder groups, or any labor organization's  
6 group. There's a lot of things that we have available to  
7 us and we'll be -- and we've heard some suggestions  
8 already today about other things that might be helpful for  
9 employers to understand it, and for members to understand  
10 what is changing and what isn't changing. So we'll  
11 definitely have a very strong communication plan in place,  
12 so that members are informed of what's -- what is changing  
13 as they go into open enrollment, so they can then make an  
14 informed decision during that time frame, which is  
15 mid-September through mid-October.

16 COMMITTEE MEMBER PACHECO: And this will be --  
17 the communication will be from both sides, not only from  
18 CalPERS, but also from the plans themselves.

19 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF  
20 JARZOMBK: It will be from all three entities, CalPERS,  
21 Blue Shield, and Included Health, yes.

22 COMMITTEE MEMBER PACHECO: Okay. Very good then.  
23 That's all my questions. Thank you, Chairman.

24 CHAIR RUBALCAVA: Thank you, Mr. Pacheco.

25 Now, we'll go to Mr. Miller and then we'll go to

1 Ms. Yvonne Walker afterwards.

2 COMMITTEE MEMBER MILLER: Yeah, thank you. I  
3 just -- I want to really acknowledge and appreciate all  
4 the work that's gone into this by our -- by yourselves and  
5 the team. I realize just what a phenomenal scope of this  
6 undertaking and all the efforts. I also want to  
7 appreciate all the input from our various stakeholders,  
8 members, employer, everyone. It all helped. And I think  
9 the proposal that's before us, to me, is very encouraging.  
10 It's groundbreaking. I think it establishes kind of a  
11 whole new way of going forward in terms of addressing  
12 performance, costs, accessibility, the accountability  
13 factor, sharing in that accountability, and kind of a new  
14 day hopefully for us and for our members. And I -- it  
15 really -- it hits all of the issues that we have raised.  
16 It hits the needs and expectations of our members and what  
17 they deserve, and I think I'm just very encouraged by it  
18 and pretty confident we're going the right direction with  
19 this.

20 And I just want to thank you and staff for  
21 putting this together in a way that I can feel comfortable  
22 that I understand it, that I'm confident in what we're  
23 trying to achieve, and more importantly confident that we  
24 are going to deliver for our members with this particular  
25 recommendation. So thank you.

1 CHAIR RUBALCAVA: Thank you, Trustee Miller.

2 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

3 JARZOMBK: Thank you very much.

4 CHAIR RUBALCAVA: Now, we'll go to Trustee -- Ms.  
5 Walker.

6 COMMITTEE MEMBER WALKER: Thank you, Mr. Chair.  
7 And I want to echo my colleagues remarks on the  
8 outstanding job I think that you have done on this. I  
9 mean, when it was presented I was like, wow, it was an  
10 absolute lot. I think it will be a benefit overall to our  
11 members.

12 So I just have a few questions and things I want  
13 to say. So one any time you go through a transition,  
14 right, and there's going to be impacts on people, I  
15 believe that as we're looking at the continuity of care,  
16 and I appreciate that the Health -- I can't remember their  
17 name. Sorry. I wrote it down, but at any rate. So I  
18 know that they going to be reaching out to everybody else,  
19 but I want to make sure that the Board is getting updates  
20 on what's happening, what's going on, and everything else  
21 as we go on, especially as it relates to the continuity  
22 transition.

23 And then I also wanted to appreciate the fact  
24 that we're going to do an early start on Included Health.  
25 That was the one I was looking for. Sorry. That we're

1 going to do an early start on Included Health, I think  
2 that's going to be extremely important, and then also  
3 wanting to make sure that -- and I'm sure they are  
4 already, but to make sure that as we go through this  
5 process, the call center -- the CalPERS call center is,  
6 you know, we've provided additional staff training or  
7 whatever, to make sure for when the calls come in that  
8 they can be handled as expeditiously as possible.

9           And also, the last thing I want to say is I am a  
10 firm believer in when you're doing things like this and  
11 overcommunicating, so -- and I know that, you know, we  
12 have processes that have been -- gone -- done throughout  
13 the past, but I'd like to recommend as we look forward to  
14 do -- you know, I know that we do the stakeholder meetings  
15 and we do retiree meetings, but maybe wanting to ramp them  
16 up a little bit as we go through, because I know for a lot  
17 of the retirees they'll talk to their organizations first.  
18 And we want to make sure that their organizations are in  
19 the best way to help, and that we're all saying the same  
20 thing, and being on the same page, and making sure that  
21 our constituents are being helped as much as possible.

22           So I think that that's it, other than to just  
23 once again say I think you guys have done a very good job  
24 on this.

25           CHAIR RUBALCAVA: Thank you, Ms. -- Trustee

1 Walker. Don, I think we should take that as Board  
2 direction to make sure there's reports to the Board on  
3 continuity of health -- continuity of the care as we go  
4 through the --

5 CHIEF HEALTH DIRECTOR MOULDS: Absolutely, yeah.

6 CHAIR RUBALCAVA: Thank you.

7 CHIEF HEALTH DIRECTOR MOULDS: I think that's  
8 important and something we're committed to.

9 CHAIR RUBALCAVA: Thank you. Next, we'll have  
10 Mr. Palkki -- Trustee Palkki.

11 VICE CHAIR PALKKI: Thank you, Chair. I'm not  
12 going to repeat anybody. I think what was said has  
13 already been said. I do want to just add one little  
14 caveat though. When we do reach out to communicate with  
15 the members that we add some communication to our Spanish  
16 speaking members. I know that we started that and I want  
17 us to continue that. And any way we can support  
18 individuals that speak a language other than English, that  
19 we make them feel comfortable as well too. So thank you.

20 CHAIR RUBALCAVA: Thank you, Mr. Palkki. And  
21 then we have Mr. Frank Ruffino for Trustee Ma, Treasurer  
22 Ma.

23 ACTING BOARD MEMBER RUFFINO: Thank you. Thank  
24 you, Mr. Chair. And thank you again. You know, I just  
25 want to echo the comments already made by the rest of the

1 members. Treasurer Ma really reappreciates Rob, Don, and  
2 the entire Health Benefits team, all your incredible work  
3 on this.

4           That said, you addressed it in your presentation  
5 a little bit regarding the transition to Blue Shield of  
6 California and Included Health. And I believe Mr. Pacheco  
7 and even Yvonne sort of touched on this a bit. But would  
8 you be -- can you elaborate a bit more on the specific  
9 steps and perhaps timeline for the transition activity  
10 just to ensure that members experience the very minimal  
11 disruption, especially those who have been with Anthem for  
12 a very long time. It would be helpful. Thank you.

13           HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

14 JARZOMBK: Sure. So one of the things that we're  
15 recommending is in the recommendation that's in the Board  
16 materials within the agenda item is to bring Included  
17 Health on board, so they can be ready to go to help  
18 members during open enrollment. And so this is something  
19 that was -- we realized was very important, because we  
20 want to make sure members can make that informed decision  
21 during open enrollment about what clinicians are still  
22 available in the network. As we talk about, there is a  
23 very high level of overlap between the current network and  
24 the proposed networks moving forward. And so we want to  
25 make sure members are confident, knowing that they can

1 stay in the PPOs and still have access to the clinicians  
2 that they have a relationship with or that their family  
3 has a relationship with.

4           So the timeline of that is to bring Included  
5 Health on board before open enrollment. And so that is  
6 where that will happen and that will be the first time  
7 where members will be able to contact Included Health to  
8 actually work through their open enrollment issues -- not  
9 issues. I should say work through the questions they may  
10 have to get validation that they're in -- that their  
11 provide will be in-network, or work to help them find a  
12 new in-network clinician for 2025. And so that portion  
13 will happen in the August time -- August and September  
14 time frame. Open enrollment begins on September 16th and  
15 goes through October 11th or so. And so we need to make  
16 sure that that Included Health contract is in place and  
17 that they're on board then.

18           And so that is where the -- where the member  
19 service aspect and the population health management  
20 services will be ver important this year before we even  
21 get to the new third-party administrator start date of  
22 1-1-25.

23           ACTING BOARD MEMBER RUFFINO: Excellent. Thank  
24 you and thank you, Mr. Chair.

25           CHIEF HEALTH DIRECTOR MOULDS: You know, I'll

1 also just add that this is something that Included does.  
2 So they, in some instances, have worked with employers  
3 solely for the purposes of transitioning from one PPO to  
4 another PPO. So they have -- I mean, all of the  
5 population health services that we've talked about are why  
6 we brought them on, but this is also a really important  
7 role and it's something that they have direct experience  
8 and a long history of doing.

9 CHAIR RUBALCAVA: Okay. No more questions from  
10 the Committee. So I think we'll call on public comment  
11 for this item. And we have Terry Brennand.

12 I like your T-shirt.

13 TERRY BRENNAND: Yeah, I was at the rally today.  
14 (Laughter).

15 TERRY BRENNAND: Good afternoon, Mr. Chair and  
16 Trustees. Terry Brennand on behalf of SEIU California.

17 While I'm loathe to pile on all the accolades for  
18 Don and Rob, they did a fantastic job. Their team -- this  
19 was a very complex, complicated, hard time to have these  
20 negotiations and I think the end result is something that  
21 hopefully will be transformative for our members in  
22 receiving health care through CalPERS. There are so many  
23 of our members that don't have access to an HMO, do not  
24 have access to anything other than the PPO, and we needed  
25 the change we're seeing in these proposals.

1 I do want to make one admonition, based on our  
2 past experience in this field, and I guess as sort of a  
3 warning to the new provider should you choose, it's that  
4 when they get into tough negotiations with a provider,  
5 they've often threatened to cancel the contract, actually  
6 canceled some contracts, sent letters out to our members  
7 to engage them and put the pressure on it. It would be  
8 much more effective if they came to us, came to CalPERS.  
9 You'll be shocked to know unions have a little bit of  
10 experience in negotiating and treating us like a partner  
11 instead of driving fear would be a much more effective way  
12 to get results, when we're trying to lean on a provider  
13 that's not acting appropriately, not negotiating in good  
14 faith and the like.

15 So we hope, if it's Shield, that when we go into  
16 the future, that will be their approach to tough  
17 negotiations. Lean on your partners, don't threaten them.

18 With that, we support the staff recommendation  
19 and look forward to your adoption. Thank you.

20 CHAIR RUBALCAVA: Thank you, Mr. Brennand.

21 With that, I'll call on Ms. -- President Taylor.  
22 I'll entertain your motion.

23 COMMITTEE MEMBER TAYLOR: Thank you, Chair  
24 Rubalcava. So I move to approve the staff recommendation  
25 to accept our Option number 1, Blue Shield and Included,

1 and implement them -- part two, implement them starting  
2 for the 2025 year.

3 COMMITTEE MEMBER MILLER: Second.

4 CHAIR RUBALCAVA: Second by Mr. Miller.

5 now, we'll have the vote. The roll call, please.

6 BOARD CLERK ANDERSON: Kevin Palkki?

7 VICE CHAIR PALKKI: Aye.

8 BOARD CLERK ANDERSON: Debora Gallegos?

9 ACTING COMMITTEE MEMBER GALLEGOS: Aye.

10 BOARD CLERK ANDERSON: David Miller?

11 COMMITTEE MEMBER MILLER: Aye.

12 BOARD CLERK ANDERSON: Eraina Ortega?

13 COMMITTEE MEMBER ORTEGA: Aye.

14 BOARD CLERK ANDERSON: Jose Luis Pacheco?

15 COMMITTEE MEMBER PACHECO: Aye.

16 BOARD CLERK ANDERSON: Theresa Taylor?

17 COMMITTEE MEMBER TAYLOR: Aye.

18 BOARD CLERK ANDERSON: Yvonne Walker?

19 COMMITTEE MEMBER WALKER: Aye.

20 BOARD CLERK ANDERSON: Mullissa Willette?

21 COMMITTEE MEMBER WILLETTE: Yes.

22 CHIEF HEALTH DIRECTOR MOULDS: Mr, Chair, if it's  
23 okay, I think the other piece of this that we're proposing  
24 is that we start the Included contract prior to 2025.

25 CHAIR RUBALCAVA: Right. September.

1 CHIEF HEALTH DIRECTOR MOULDS: If we could get  
2 your vote on that, that would be --

3 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF  
4 JARZOMBK: And so that was the --

5 CHAIR RUBALCAVA: Can you amend your --

6 COMMITTEE MEMBER TAYLOR: So I can just amend it  
7 to start the Included contract.

8 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF  
9 JARZOMBK: And it's actually what is written in the  
10 agenda item. So you just want to approve the  
11 recommendation of the agenda item, that will cover  
12 everything nicely.

13 COMMITTEE MEMBER TAYLOR: Okay. So we're  
14 amending that to --

15 CHAIR RUBALCAVA: So that will be our -- that  
16 would be our call then.

17 COMMITTEE MEMBER TAYLOR: Yeah.

18 CHAIR RUBALCAVA: That is our -- thank you.

19 I also want to take this moment to thank Don and  
20 the staff for all the work you've done on the PPO. I know  
21 it's amazing undertaking, but I think the goal to elevate  
22 how we handle PPO to bring in some quality measures that  
23 we already have in the HMO to the PPO will be great.  
24 Also, the whole aspect of differentiating the Gold PPO, so  
25 it can be seen as a quality network, that was to maybe a

1 little bit smaller. I think that's -- the results we'll  
2 see it in the lives saved, the quality outcomes for our  
3 patients, and our members. So I thank you for all that  
4 work you've done -- you and your staff have done.

5 CHIEF HEALTH DIRECTOR MOULDS: And thanks. And,  
6 Mr. Rubalcava, if I could have a moment of personal  
7 privilege.

8 CHAIR RUBALCAVA: Please.

9 CHIEF HEALTH DIRECTOR MOULDS: I wanted to thank  
10 a few folks. One is our partners at Anthem.

11 CHAIR RUBALCAVA: Yes, of course.

12 CHIEF HEALTH DIRECTOR MOULDS: So they've been  
13 our PPO partner for a long time now. They really -- they  
14 really put a lot of effort into their solicitation. When  
15 Rob says this was a competitive solicitation, it was a  
16 competitive solicitation. They -- both insurers are well  
17 out of their comfort zones in these negotiations. And we  
18 appreciated it coming from both of them. And especially  
19 to Anthem, they were very disappointed when we told them  
20 what our recommendation would be to the Board, but they  
21 have signaled early that they would be helpful partners in  
22 the transition and they have, to date, made good on all of  
23 that. They've been great at being responsive about the  
24 need that we're going to have now to start sharing data on  
25 our PPO members with Blue Shield and in all of the work

1 that we need to do to make sure that this is as seamless  
2 as possible. So I want to thank them for that.

3 I also want to thank there -- and this list is  
4 somewhat long. I apologize, but I don't really apologize.  
5 I want to thank the team members who put a lot of time  
6 into this. There were a lot long hours and more weekends  
7 than I would acknowledge in front of Mr. Brennand, Brenda  
8 Yee, Juliet Lac, Lisa Albers, Kellye Smith, Emily Zhong,  
9 Hilary Kyumba, Julia Logan, Rob, Kristen Owens, Ryan  
10 Yamadera, and David Van der Griff from CalPERS. And then  
11 we had three consultants that we spent a lot of time with.  
12 Peter Lee, who you've heard from a few times, but also  
13 Barb Dewey, and Coleen Young. Barb, a couple of years  
14 ago, moved back to Vermont. And so had many calls where  
15 her kids would bring dinner into her as we were on calls  
16 working through this, and a few sad ones where they would  
17 come in and say good night, but we deeply appreciate their  
18 efforts and their support on this project as well. So  
19 thank you.

20 CHAIR RUBALCAVA: No, that's very appropriate to  
21 recognize staff, because this was quite an undertaking.

22 COMMITTEE MEMBER TAYLOR: I'm being told that we  
23 were clear, so I have to redo that motion.

24 CHAIR RUBALCAVA: Okay. Before we do that,  
25 please, Ms. President, we have a caller on the line, so

1 let's hear from our public first and then we'll retake the  
2 motion and the vote.

3 So the caller, are you there?

4 Hello.

5 Do we have a caller on?

6 DAVID AGUINALDO: Hello.

7 CHAIR RUBALCAVA: Hell. Please proceed.

8 DAVID AGUINALDO: Oh, wonderful. Thank you.

9 Hi, everyone. My name is David Aguinaldo. I am  
10 an auditor with the CDTFA. I work out of state. And so I  
11 just wanted to come on for this agenda item and just --  
12 obviously, this choice between these two potential PPO  
13 providers is going to weigh heavily on our members and out  
14 of state, as all of us have only one choice, and which is  
15 the PERS Platinum -- PERS Platinum plan.

16 So, I know that you all spoke a little bit about  
17 some of the network changes that might be happening. I  
18 just -- and how, you know, while most things will overlap,  
19 some things won't. I was just curious if those statistics  
20 that you provided were speaking directly about California  
21 or about the entire network across the entire country, and  
22 if special attention was given to make sure --

23 COMMITTEE MEMBER TAYLOR: Is this David?

24 DAVID AGUINALDO: -- just because we have people  
25 living in so many different states with so many -- with

1 such a different range of health care providers, I am  
2 concerned that maybe an outsized number of those, you  
3 know, issues of providers not being, you know, continuous  
4 may fall on out-of-state members. I didn't really hear  
5 anything addressing that. So that was just something I  
6 wanted to check in on.

7           The other thing that was also interesting --  
8 well, I'll get to that later. So, yes, I'll just start  
9 with there -- was there consideration for those  
10 out-on-state members that rely on this PPO Platinum plan  
11 to make sure that, you know, we're not going to be  
12 disproportionately affected by this.

13           CHAIR RUBALCAVA: Thank you for your call and we  
14 do have an answer for you.

15           HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF  
16 JARZOMBK: So yes. So thank you for that question. So  
17 for our out-of-state members, there will be no change to  
18 network. So both Anthem Blue Cross and Blue Shield of --  
19 Blue Shield use the same out-of-state network. They're  
20 part of the Blues family and so it will be the same  
21 network that our out-of-state members have today will be  
22 the network that is going to be in place for 2025.

23           DAVID AGUINALDO: Okay. That's great. Thank you  
24 very much for your answer.

25           CHAIR RUBALCAVA: Okay. Now, we understand we

1 need to retake the motion, so --

2 COMMITTEE MEMBER TAYLOR: Yeah. So I'm going to  
3 read it, because it does have specifics in it.

4 Approve the recommendation of an intent to award  
5 a five-year -- five-year contracts to Blue Shield of  
6 California as the third-party administration --  
7 administrator and Included Health as the population health  
8 management vendor for CalPERS PPO plans with an effective  
9 date of January 1, 2025. Awards are subject to the final  
10 negotiations and satisfaction of all requirements,  
11 including, but not limited to, implementation activities  
12 occurring in 2024.

13 COMMITTEE MEMBER MILLER: (Hand raised).

14 CHAIR RUBALCAVA: So, Mr. Miller -- Trustee  
15 Miller seconds. And now, we'll call the vote again.

16 BOARD CLERK ANDERSON: Kevin Palkki?

17 VICE CHAIR PALKKI: Aye.

18 BOARD CLERK ANDERSON: Deborah Gallegos?

19 ACTING COMMITTEE MEMBER GALLEGOS: Aye.

20 BOARD CLERK ANDERSON: David Miller?

21 COMMITTEE MEMBER MILLER: Aye.

22 BOARD CLERK ANDERSON: Eraina Ortega?

23 COMMITTEE MEMBER ORTEGA: Aye.

24 BOARD CLERK ANDERSON: Jose Luis Pacheco?

25 COMMITTEE MEMBER PACHECO: Aye.

1 BOARD CLERK ANDERSON: Theresa Taylor?

2 COMMITTEE MEMBER TAYLOR: Aye.

3 BOARD CLERK ANDERSON: Yvonne Walker?

4 COMMITTEE MEMBER WALKER: Aye.

5 BOARD CLERK ANDERSON: Mullissa Willette?

6 COMMITTEE MEMBER WILLETTE: Yes.

7 CHAIR RUBALCAVA: Okay. The ayes have it, motion  
8 passes. There's no abstentions or no -- nobody vote --  
9 the Committee voted.

10 I, too, want to thank Anthem for their service on  
11 the TPA services and look forward working with -- to  
12 staff, CalPERS -- working with CalPERS staff on the  
13 transition. Thank you.

14 So now, we'll move on to the next item, which is  
15 Informational Item number 6a, the 2025 HMO and PPO plan  
16 premiums. Don Moulds and Rob.

17 (Thereupon a slide presentation).

18 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF  
19 JARZOMBK: Okay. Good afternoon again, Mr. Chair and  
20 members of the Committee. This is an information item to  
21 update you on the preliminary 2025 rates for the Basic HMO  
22 and Medicare Advantage plans. I will also share how the  
23 rates for the Basic PPO, Medicare -- Basic PPO and  
24 Medicare Supplement plans correspond with the new  
25 third-party administrator and population health management

1 vendor contracts we just discussed.

2 [SLIDE CHANGE]

3 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

4 JARZOMBEK: Here is our agenda. We'll begin with the  
5 timeline for this rate development process. We'll provide  
6 a quick refresher on how we set premiums, go over  
7 influencers and trends for 2025, and talk about our  
8 transition to a single risk pool and the impacts it has on  
9 the HMO and PPO plans. We will then walk through each  
10 plan's preliminary premium and the factors impacting it.

11 [SLIDE CHANGE]

12 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

13 JARZOMBEK: I'll start with a timeline. In November, you  
14 approved service area expansions and benefit design  
15 changes for the 2025 plan year. This included service  
16 area changes and adding the doula -- the travel and doula  
17 benefits to our program. These changes are incorporated  
18 into the premiums you'll see today.

19 In May, we presented the initial premiums for all  
20 plans to you in closed session. And today is the first  
21 time we are presenting the preliminary premiums to you in  
22 open session and to the public. Then in July, we'll  
23 present the proposed final premiums for your adoption at  
24 the Board off-site.

25 [SLIDE CHANGE]

## 1 HEALTH PLAN RESEARCH &amp; ADMINISTRATION CHIEF

2 JARZOMBEK: As a refresher, I'll go over what makes up a  
3 premium and the process we use to determine what the  
4 premiums should be. The premiums can be broken down into  
5 three components, medical, pharmacy, and administration.

6 Medical is the cost of medical services provided.  
7 This includes inpatient, outpatient, and other  
8 professional services.

9 Pharmacy represents the cost of outpatient  
10 prescription drugs filled at a local pharmacy or through  
11 mail order.

12 Administration is the health plan's  
13 administrative fee and CalPERS administrative expenses.

14 To get the per member, per month rate, or PMPM  
15 rate, we add the medical, pharmacy, and admission --  
16 administration components together. Once we have that  
17 rate, we convert it to a premium by applying a family  
18 factor that takes into account the number of dependents in  
19 each health plan. We apply a family factor, because young  
20 dependents typically incur lower medical costs than  
21 adults. This changes the PMPM rate to a per subscriber  
22 per month or PSPM premium. This is the premium amount  
23 that is presented publicly and charged to members and  
24 employers.

25 A few years ago, we greatly improved how we set

1 health premiums to enhance transparency with each plan's  
2 proposed rate and improved our negotiating position. We  
3 use claims in the data warehouse along with financial  
4 information to create a baseline projection for each plan.  
5 We then compare it to the plan's proposed rate. We  
6 require the plans to submit their proposal in specific  
7 categories using a standard methodology, so that we can  
8 conduct an apples-to-apples comparison to our projections.  
9 We also require them to submit an actuarial attestation of  
10 their proposals. Further, we engage an independent  
11 actuarial consulting firm to conduct a third-party  
12 verification and review.

13           Our approach using standardized methodology  
14 allows CalPERS to drill into significantly more detail  
15 with the plans to understand what's driving trends at the  
16 plan level.

17           Finally, we risk adjust premiums for the basic  
18 plans. We do not risk adjust the Medicare plans as this  
19 is done by CMS through their own process. Risk adjustment  
20 of the Basic plans allows us to price plans based on the  
21 value of their Benefit design and network, rather than on  
22 the concentration of healthy or unhealthy lives in the  
23 plan. This pushes the plans to compete on the cost and  
24 quality of care, instead of on their ability to attract  
25 younger and healthier members.

1           As you know, last year, the Board approved the  
2 transition from two risk pools, one for HMOs and one for  
3 PPOs, to a single risk pool for all Basic plans. With  
4 2024's premiums, we took one-third of the step towards a  
5 single risk pool. This was done to stabilize the PPO.

6           The last item on this slide is how we set  
7 premiums for public agencies and schools, as there is an  
8 extra step to that process. We start with the State  
9 premium calculated for State of California and CSU  
10 members. Despite the fact that there are State employees  
11 in every county, the State as an employer uses the same  
12 pay scale, classifications, and benefit structure for  
13 everyone. Therefore, they use the same premiums  
14 regardless where State employees reside.

15           We have three pricing regions for our contracting  
16 agencies, one in Northern California and two other regions  
17 in Southern California. We included the preliminary  
18 premiums for these regions in the attachments to this  
19 presentation.

20                                   [SLIDE CHANGE]

21           HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF  
22 JARZOMBEC: On the Basic side, medical inflation and  
23 pharmacy costs are always the two big drivers of premium  
24 increases. In the 2025 submissions, we are seeing a  
25 pretty good medical inflation trend that is slightly lower

1 than national benchmarks. The story is not positive,  
2 however, for pharmacy costs. In 2023, we saw higher than  
3 anticipated pharmacy spend and this trend is expected to  
4 continue in '24 and '25.

5 In fact, you will see that pharmacy costs  
6 contribute to a material portion of the 2025 premium  
7 increases for most of the plans that we'll -- that I'll  
8 share later. Although our Optum contract has competitive  
9 pricing, the increase use of high cost brand and specialty  
10 drugs contributed to the total pharmacy spend going up by  
11 double digits. This is driven by changing guidelines for  
12 common diseases like diabetes and the increased use of  
13 pharmaceuticals for chronic conditions.

14 For Medicare plans, both medical and pharmacy are  
15 major contributors to premiums with the same issues that  
16 caused them to be driven on the Basic side applying to the  
17 Medicare plans too. Additionally, due to the Inflation  
18 Reduction Act, the amount of money the federal government  
19 contributes is also a factor. This creates additional  
20 costs for plans and purchasers and uncertainties in  
21 projecting pharmacy costs in the Medicare plans for 2025.  
22 We will talk more about this later in the Medicare  
23 section.

24 [SLIDE CHANGE]

25 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

1 JARZOMBEK: Before going into premiums, I would like to  
2 discuss our recommendation for making the full transition  
3 to a single risk pool in 2025 for the Basic portfolio. As  
4 you certainly remember, last year, you voted to transition  
5 from two distinct risk pools, one for the HMO plans and  
6 one for the PPO plans, to a single risk pool in our risk  
7 adjustment process for all Basic plans. You did this  
8 because the previous structure was contributing to the  
9 instability of PPO premiums and was ultimately  
10 unsustainable.

11 When you voted to do this, you also voted to do  
12 it over three years with 1.3 percent premium impact to the  
13 HMOs each year. This was done in part because last year,  
14 we were facing very high HMO rates, so adding to them was  
15 going to be particularly tough on our HMO members and  
16 especially on our over 500,000 Kaiser members. Currently,  
17 we are slated to take the second step of the three steps  
18 towards a single risk pool in 2025 and the final step in  
19 '26.

20 The HMO premiums -- premium increases are much  
21 improved this year compared to last year, but we continue  
22 to worry about the stability of the PPO and recommend  
23 fully transitioning to a single risk pool next year. Here  
24 are the key factors influencing our recommendation.

25 The Basic PPOs continue to experience high

1 medical and pharmacy costs. The overall medical cost in  
2 2023 increased by a double digit trend from 2022, and as a  
3 result, the funded status of the Health Care Fund  
4 continues to worsen. Despite having the surcharge that  
5 was expected to accrue approximately \$110 million this  
6 year, our updated projection shows that the funded status  
7 of the HCF is not going to improve at all. In fact, we  
8 are currently projecting to lose approximately \$17 million  
9 this year, largely due to unanticipated increases in the  
10 utilization of high cost specialty and brand name drugs.

11 Because the HCF is in such a serious situation,  
12 yesterday in the Investment Committee, the team  
13 recommended changing its investment allocation from bonds  
14 to a hundred percent short-term cash equivalent assets.  
15 This is recommending to protect against principal losses  
16 and ensure cash is available in case it is needed to pay  
17 claims. For a fund of this nature, it is highly unusual  
18 to have a hundred percent liquidity.

19 At this point, maintaining a stable population in  
20 the PPO program is a key factor in replenishing the needed  
21 reserves in the HCF. Therefore, the sooner the transition  
22 to one risk pool, the quicker we can stabilize the Basic  
23 program by minimizing member migration from the PPOs to  
24 the HMOs.

25 The final factor I'll note is that with a full

1 transition to a single risk pool in '25, the path is  
2 quickened to having single digit premium increases for the  
3 PPOs in future years. This is because more members would  
4 remain in the PPOs. Further, for the new PPO contracts to  
5 perform optimally, a stable population is also needed  
6 making this the crucial time for the full transition.  
7 This will put us on a shorter path to bring future PPO  
8 premium increases back to the single digits.

9 [SLIDE CHANGE]

10 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

11 JARZOMBEC: This slide shows the differences between the  
12 continued phase-in approach and making the full transition  
13 to a single risk pool in 2025. With a continued phase-in,  
14 the Basic PPO would see an approximate 15 percent premium  
15 increases, including A 3.7 percent downward premium  
16 adjustment for the second year of the three-year phase-in.  
17 With this increase, we project a membership loss of about  
18 10 percent this 2025. With the full transition next year,  
19 the Basic PPO would see an approximate 10 percent premium  
20 increase, with 7.5 percent downward premium adjustment.  
21 We project a loss of five percent of its membership  
22 cutting it in half.

23 While the one risk pool transition is helping the  
24 PPOs tremendously, on the flip side, the upward impacts to  
25 the HMO plans are relatively modest. The Basic HMO would

1 see an average premium increase of 7.44 percent for the  
 2 continued phase-in to one risk pool. This includes the  
 3 1.3 percent upward adjustment. The HMOs would have a 2.7  
 4 percent membership gain as a result. And for the full  
 5 transition, the HMO premium increase is 8.72 percent due  
 6 to the larger 2.6 percent upward adjustment. Under this  
 7 scenario, we project a 1.5 percent membership gain for the  
 8 HMOs

9 The bottom line here is the sooner we complete  
 10 the transition to one risk pool, the quicker we can  
 11 stabilize the Basic program by minimizing migration from  
 12 the PPOs to the HMOs.

13 [SLIDE CHANGE]

14 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF  
 15 JARZOMBK: Now, let's take a look at the proposed plan  
 16 premiums for next year and how they are impacted under  
 17 each scenario.

18 [SLIDE CHANGE]

19 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF  
 20 JARZOMBK: Starting with the Basic HMO plans. And as a  
 21 reminder, the numbers throughout this presentation are all  
 22 the single party premiums. From left to right, we have  
 23 the 2024 premiums and updated 2025 premiums with a  
 24 continued phase-in to one risk pool. The weighted average  
 25 again under the -- this scenario is 7.44 percent, which

1 does include the 1.3 percent associated with the one-third  
2 step to a single risk pool. The green session -- section,  
3 or the columns on the far right, show the HMO premiums  
4 under the recommended full transition to one risk pool in  
5 2025. So it shows an additional 1.3 percent premium  
6 increase for an average of 8.72 percent.

7           These comparatively modest increases for the HMOs  
8 will help the PPOs tremendously as it reduces the PPO  
9 increase by five percent. Let's take a closer look.

10                           [SLIDE CHANGE]

11                   HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

12 JARZOMBEK: For the PPO plans and with the action you just  
13 took with the intent to award the third-party  
14 administrator and population health management contracts,  
15 we will focus on Option 1 with Blue Shield and Included  
16 Health starting in 2025.

17           With a continued three-year phase-in, the Basic  
18 PPOs would see an approximate 15 percent premium increase.  
19 With this increase, again, we project a membership loss of  
20 about 10 percent.

21           Moving to the green section, or the section on  
22 the far right, with the full transition, the PPOs would  
23 see an approximate 10 percent premium increase and only  
24 leave about -- lose about five percent of its membership,  
25 again cutting that outward migration in half.

1           Comparatively small increases to the HMOs will  
2 help the PPOs a great deal. So I'll pause here and ask if  
3 there are any questions before moving forward.

4           CHAIR RUBALCAVA: I have one question.

5           COMMITTEE MEMBER TAYLOR: Not right now.

6           CHAIR RUBALCAVA: Okay. No questions.

7           Please continue.

8                               [SLIDE CHANGE]

9           HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

10 JARZOMBEC: Moving on to the Medicare plans. 2025 is  
11 going to be an extremely challenging year for Medicare  
12 premiums. This is the second year we're experiencing an  
13 overall premium increase for the MA plans after having  
14 three consecutive years of overall MA premium decreases.  
15 The average premium increase for Medicare Advantage plans  
16 is just under 14 percent.

17                               [SLIDE CHANGE]

18           HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

19 JARZOMBEC: Next, here are the Medicare Supplemental plan  
20 premiums. The proposed 2025 premiums increase about 30  
21 percent from 2024, mainly due to the Inflation Reduction  
22 Act impacts to the pharmacy rates. I'll explain what  
23 these changes are when we get to the Medicare section.

24                               [SLIDE CHANGE]

25           HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

1 JARZOMBEC: Now, I'll walk through each Basic HMO plan.

2 [SLIDE CHANGE]

3 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

4 JARZOMBEC: First is Anthem Select. We have two tables on  
5 each slide. The top table in blue shows the risk  
6 adjustment impacts with the continued phase in to one risk  
7 pool. The bottom table in green shows the premium impact  
8 and risk -- premium and risk adjustment impacts with the  
9 recommended full transition to a single risk pool in 2025.  
10 I'll walk through the bottom green table. It shows the  
11 2024 premium, 2025 -- the plan's 2025 premium before risk  
12 mitigation and the plan's risk score. Plans with a score  
13 greater than one, with one being the average, have sicker  
14 lives and their premium is lowered with the impact of risk  
15 adjustment. Plans with risk scores less than one have  
16 healthier lives and will see risk adjustment increase  
17 their premium.

18 Anthem Select has a risk score of less than one,  
19 meaning that the plan has healthier than average members  
20 in the Basic portfolio. Therefore, the 2025 premium is  
21 increased and that amount is shown in the fourth column,  
22 \$79.69.

23 In the final two columns you will see the  
24 proposed 2025 premium and the percent increased from '24.  
25 For all plans, the cost drivers chart to the right

1 reflects the full transition to one risk pool in 2025 and  
2 breaks down the premium impacts by component. The first  
3 bar is medical cost and they contribute about three  
4 percent to the -- three percent increase to the premium.  
5 The next bar is pharmacy, which contributes about five  
6 percent impact to the premium. The third bar is program  
7 changes, which shows a very small premium increase  
8 associated with adding the travel and doula benefits next  
9 year. The fourth bar is labeled "other", and includes  
10 overall changes on administrative costs both CalPERS and  
11 the plans. It also includes changes in the family mix of  
12 plan's enrollment.

13           Anthem Select lost about 17 percent of its  
14 membership during open enrollment and that led to a one  
15 percent downward premium impact due to the change in the  
16 family mix. Risk mitigation is more than three percent of  
17 the total premium increase. This is the increase on the  
18 risk mitigation impacts from 2024 to 2025. Adding this  
19 all together, the green bar on the far right, the last bar  
20 on the far right shows an overall increase of 10.39  
21 percent with the full transition to one risk pool. For  
22 simplicity, and as we go through the remainder of the  
23 plans, I'll just share the risk adjustment impacts from  
24 the bottom green table which is the tran -- full  
25 transition to a single risk pool.

1 [SLIDE CHANGE]

2 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

3 JARZOMBEEK: Moving to Anthem Traditional. This is a broad  
4 network plan offered in many high-cost, low-competition  
5 areas of the state. Anthem Traditional is a plan that we  
6 have concerns about it's longterm sustainability in our  
7 program. We will continue to closely monitor this plan to  
8 ensure it remains a viable product for CalPERS.

9 Traditional's 2025 premium increase is nine and a quarter  
10 percent.

11 [SLIDE CHANGE]

12 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

13 JARZOMBEEK: Blue Shield Access+ is also a broad network  
14 HMO. In the last few years, Blue Shield has been helping  
15 us achieve our goal of having an HMO or EPO option  
16 available in all rural counties. In 2023, Access+  
17 expanded into 11 rural counties through their EPO network.  
18 In 2024, the EPO exapands into Del Norte and San Benito  
19 counties. This plan has a 2025 premium increase of eight  
20 and a quarter percent.

21 [SLIDE CHANGE]

22 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

23 JARZOMBEEK: Blue Shield Trio is a narrow high performance  
24 network that started with CalPERS in 2020 in six counties.  
25 It has been expanding its footprint over the past few

1 years to bring a low cost alternative to more of our  
2 members. In 2024, it's available in 19 counties and is  
3 expanding into Contra Cost, Shasta -- and Shasta counties  
4 in 2025. The Shasta County expansion is pending DMHC  
5 approval. Blue Shield did not project a rate impact for  
6 these expansions. Trio's 2025 premium increased by 12.2  
7 percent. And one of the main cost drivers is medical  
8 costs. Trio's membership increased by 34 percent during  
9 last year's open enrollment with the risk improving by  
10 about six percent. A significant portion of the  
11 membership gains came from Monterey County, where the  
12 membership tripled growing from about 2,100 members to  
13 6,800 members, which was higher than Blue Shield's  
14 projections.

15 As we know, medical care in Monterey County is  
16 some of the most expensive this California. Overall, the  
17 projected medical cost contributed seven and a quarter  
18 percent to the 2025 premium increase. The improvement in  
19 Trio's risk score also contributes to this with about five  
20 and three-quarters percent. Trio has an overall 12.2  
21 percent increase for next year.

22 [SLIDE CHANGE]

23 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF  
24 JARZOMBK: Health Net Salud y Más is a very narrow  
25 network that provides services in six Southern California

1 counties, as well as in Mexico. For next year, Salud y  
2 Más is expanding into Imperial County, and that is pending  
3 DMHC approval. Medical contribute to almost seven percent  
4 of the premium increase. Salud y Más has been the lowest  
5 premium plan in our basic program thanks to its low cost  
6 narrow network and Southern California service area.  
7 Their membership has been growing and members are starting  
8 to use more expensive providers. Similar to most plans,  
9 pharmacy contributed about three and a half percent to the  
10 increase. This was due to the increase in utilization of  
11 brand and specialty drugs.

12 The Imperial expansion adds about 1.2 percent to  
13 the increase and risk mitigation contributes about three  
14 percent to the increase. Overall, they are seeing a 14  
15 and three-quarter percent increase for next year.  
16 However, they are still the lowest cost basic plan in our  
17 portfolio.

18 [SLIDE CHANGE]

19 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

20 JARZOMBEK: Kaiser Permanente is the largest health plan  
21 in our basic portfolio making up about half of the total  
22 basic membership. For 2025, Kaiser is pursuing a partial  
23 county expansion into Monterey with no projected rate  
24 impact. This will be the third HMO that CalPERS has  
25 brought into Monterey after Anthem Select and Blue Shield

1 Trio. For this expansion, Kaiser is opening up a new  
2 Salinas medical office in the northern part of Monterey  
3 County, with outpatient care, including adult and  
4 pediatric primary care, OB/GYN, behavioral health,  
5 laboratory and pharmacy services. In-patient care will be  
6 provided at their affiliated hospital, Watsonville  
7 Community Hospital. The Monterey County expansion is  
8 pending DMHC approval. And Kaiser reports that they are  
9 very confident that this will be approved. Kaiser's 2025  
10 premium increase is just over eight percent.

11 [SLIDE CHANGE]

12 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

13 JARZOMBEK: Sharp is a narrow network plan available only  
14 in San Diego County. Looking at the cost drivers for them,  
15 Medical inflation and -- medical inflation and pharmacy  
16 contribute to about five and a half percent of the premium  
17 increase. The premium increase is offset by risk  
18 mitigation changes of about 1.2 percent. Sharp had high  
19 medical costs in 2023, driven by the increased number of  
20 members with chronic conditions. The increase in medical  
21 costs resulted in a higher risk score, and therefore Sharp  
22 received a downward risk adjustment impact compared to  
23 2024. Sharp's 2025 premium increase is four and a quarter  
24 percent.

25 [SLIDE CHANGE]

1 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

2 JARZOMBK: Turning to UHC Alliance, the premium increase  
3 is mainly due to medical costs contributing to over four  
4 percent and pharmacy about three percent. Risk mitigation  
5 increases the premium by about two percent. Overall,  
6 their preliminary -- their premium increase is 8.88  
7 percent.

8 [SLIDE CHANGE]

9 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

10 JARZOMBK: UHC Harmony is a narrow network currently  
11 available in seven counties, five Southern California  
12 counties and two Northern California counties. Harmony is  
13 expanding into Napa, Contra Costa, and Solano counties in  
14 2025. UHC is honoring their commitment from last year's  
15 HMO solicitation to expand harmony into areas of the state  
16 where lower cost plans aren't prevalent while continuing  
17 to provide competitive pricing. As you can see from the  
18 chart, about half of the premium increase is driven by  
19 medical and pharmacy costs and the other half is driven by  
20 the Northern California expansion. Risk mitigation  
21 increases Alliance's premium by about two percent.  
22 Harmony's premium increase is about seven and a half  
23 percent.

24 [SLIDE CHANGE]

25 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

1 JARZOMBЕК: Rounding out the Basic HMO plans is Western  
2 Health Advantage. Western Health Advantage initially  
3 proposed to expand into Fresno, King, and Madera counties  
4 for 2025, and that expansion was approved by the Board  
5 last November. Unfortunately, Western Health Advantage  
6 has not yet been able to secure the necessary provider  
7 contracts for 2025, but continues to pursue them for '26.

8 Most of the premium increase for WHA came from  
9 the risk mitigation impact. Previously, Western Health  
10 Advantage had a sicker than average population, which  
11 meant they received a positive downward impact of risk  
12 adjustment to their premium. However, their membership  
13 increased by 28 percent during last year's open  
14 enrollment, with their new members being some of the  
15 healthiest in the Basic HMO program. Those new members  
16 had an average risk score of about 30 percent below the  
17 average HMO risk score, thus improving WHA's overall risk  
18 score by nine percent. This created a risk mitigation  
19 impact that contributed approximately 10 and a half  
20 percent to the total premium increase. Western Health's  
21 premium increase for 2025 is just over 13 percent.

22 [SLIDE CHANGE]

23 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

24 JARZOMBЕК: And now, I'll move on to the PPO plans.

25 [SLIDE CHANGE]

1 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

2 JARZOMBEC: As we've talked about a number of times now,  
3 PERS Gold and PERS Platinum Basic premiums will have a 15  
4 percent increase with the continued two-year phase-in to  
5 one risk pool. This -- our recommendation is on fully  
6 moving to one risk pool with a premium increase of about  
7 10 percent. The main cost drivers here were the medical  
8 and pharmacy costs, raising the premium by over 15 and a  
9 half percent. Through this solicitation, we are investing  
10 in a population health management vendor. The new  
11 administrative services fees contribute about 1.7 percent  
12 to the premium increase. But this was done to improve  
13 quality and sustain costs.

14 These premiums continue to include the surcharge  
15 of four percent on Platinum and five percent on Gold to  
16 replenish the Health care reserve. The premium surcharge  
17 levels are the same as they were for '24.

18 [SLIDE CHANGE]

19 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

20 JARZOMBEC: Here's a chart compiling all of the  
21 preliminary risk-adjusted premiums. Please note that the  
22 premium ranking is very similar to 2024 under the full  
23 implementation to one risk pool.

24 [SLIDE CHANGE]

25 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

1 JARZOMBEC: Let's thousand turn to the Medicare plans.

2 [SLIDE CHANGE]

3 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

4 JARZOMBEC: As I mentioned earlier, high Medicare rate  
5 increases are -- we are seeing in 2025 are mostly driven  
6 by significant changes being made by the federal  
7 government. Of those, the most notable are due to  
8 provisions of the Inflation Reduction Act. As background,  
9 the IRA was signed into law in 2022 and designed to  
10 provide financial relief for millions of people with  
11 Medicare by expanding benefits lowering out-of-pocket  
12 costs to consumers, and strengthening the Medicare program  
13 for the future. It's the most significant change to  
14 prescription drug financing since the creation of Medicare  
15 Part D in 2006. The changes have downstream impacts to  
16 all Part D sponsors and are not unique to CalPERS.

17 The first key change for 2025 is to the benefit  
18 design that CMS uses to calculate an individual's maximum  
19 out-of-pocket costs. This change is designed to lower  
20 out-of-pocket costs for consumers when getting  
21 prescriptions. Here's how it works. The IRA imposes a  
22 \$2,000 maximum out-of-pocket cost for an individual each  
23 calendar year. New, in 2025 is that the IRA allows plan  
24 paid costs to count towards the member's \$2,000 maximum,  
25 thus reducing costs for consumers, but significantly

1 increasing them for purchasers like CalPERS. The result  
2 is that some members will be considered to have hit the  
3 out-of-pocket maximum after paying considerably less than  
4 \$2,000, resulting in the member paying less in 2025, even  
5 though CalPERS has not changed our benefit design.

6 Next, and more impactful to rates, is a change to  
7 the way CMS provides subsidies to health plans for  
8 pharmacy benefits. The subsidy changes impact CalPERS  
9 plans differently. And amongst our plans, we have both  
10 winners and losers. Here are the details.

11 Plans that have integrated systems or have fewer  
12 members on high-cost drugs will benefit from this change  
13 by receiving higher subsidy payments. This is intended to  
14 reward those plans that have more effective care  
15 management when it comes to providing pharmacy benefits.  
16 Kaiser and Sharp are examples of plans that have efficient  
17 care management of their members as well as fewer members  
18 on high-cost drugs, as they have a greater usage of  
19 generics over brand drugs. So we are seeing Kaiser and  
20 Sharp actually benefit from these changes.

21 Conversely, plans that are less efficient in  
22 their management of prescription drugs or have more  
23 members on high-cost drugs will receive lower subsidy  
24 payments going forward.

25 The last item to point out about the IRA is the

1 timing of when CMS will announce their reimbursement rate  
2 for 2025, which further complicates our rate-setting  
3 process. CMS will announce the change in subdisease in  
4 late July this year, which create a timing issue for the  
5 Medicare plans and Optum to project the 2025 costs, as we  
6 finalize our premiums mid-July.

7 Most of the plans included additional  
8 conservatism in pricing assumptions to account for the  
9 greater uncertainties in the subsidy projections, which  
10 contribute to a substantial premium increase for some  
11 plans.

12 Because of the changes CMS is implementing, we  
13 engage a third-party actuarial firm to further verify the  
14 pharmacy rating assumptions used by the health plans and  
15 Optum's to avoid unnecessary premium increases. Through  
16 our testing of these assumption, we have confirmed that  
17 all of these increases are reasonable. However, for the  
18 fully ensured plans that are not benefiting from CMS's  
19 changes, we are taking an additional step to further  
20 prevent unnecessary increases. We are doing this by  
21 establishing a premium stabilization fund for Blue Shield  
22 and UHC. This means that once the CMS subsidy amounts are  
23 announced after our premiums -- our rates are set, any  
24 additional increase that was added to the 2025 premiums  
25 will accrue in the premium stabilization fund. This fund

1 is designed to capture the difference between the  
2 announced drug subsidy minus the amount included in a  
3 plan's final 2025 premium.

4 Any accrued funds will then be returned to  
5 CalPERS. This is a big win for CalPERS, as it ensures  
6 that any potential unnecessary premium increases will come  
7 back to us and not simply be turned into profit for the  
8 health plans. We'd like to acknowledge the leadership at  
9 both UHC and Blue Shield for working together with us on  
10 this important safeguard for our members.

11 [SLIDE CHANGE]

12 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

13 JARZOMBEC: Now, let's move on to the Medicare Advantage  
14 plans.

15 [SLIDE CHANGE]

16 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

17 JARZOMBEC: Anthem's proposed initial premium is a 20  
18 percent -- 21 percent increase. This increase is mainly  
19 driven by the pharmacy cost due to the IRA changes.

20 [SLIDE CHANGE]

21 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

22 JARZOMBEC: Blue Shield's nationwide Medicare Advantage  
23 plan started with CalPERS in 2022 with just under 600  
24 members. In just two years, it has grown to roughly 5,200  
25 members. Shield is proposing a 14 percent rate increase

1 for next year. Their medical increased significantly due  
2 to cost volatility when the membership grew nearly tenfold  
3 in just two years. It's normal to see volatility on a new  
4 Medicare Advantage plan premiums for the first few years,  
5 as enrollment grow and there's a lack of experience to  
6 make accurate projections.

7 As you can see on the chart, they have a  
8 projected a significant drop in their pharmacy costs.  
9 This is mainly driven by the large increase on the  
10 pharmacy rebate assumptions, which are offset by the  
11 increases pharmacy trend and IRA impacts. And as I  
12 mentioned earlier, we are establishing the premium  
13 stabilization fund to capture the difference between the  
14 announce drug subsidy minus the amount that we assume in  
15 their final rate. This will prevent any unnecessary  
16 increases that may occur for 2025.

17 [SLIDE CHANGE]

18 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

19 JARZOMBK: Kaiser Senior Advantage is proposing a five  
20 and a half percent increase. Kaiser is showing a medical  
21 increase of almost 13 percent and a pharmacy decrease of  
22 almost eight percent, mainly due to the IRA changes. As I  
23 noted, Kaiser will benefit from the increase in federal  
24 subsidies.

25 [SLIDE CHANGE]

1 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

2 JARZOMBK: Kaiser Senior Advantage Summit was a new plan  
3 for CalPERS in '23 and available in California only. For  
4 2024, Summit is available in the eight out-of-state  
5 regions matching where their Senior Advantage and their  
6 Basic plans are available. The 2025 proposed premium for  
7 Summit is also five and a half percent from 2024. The  
8 same increase applies to the out-of-state plan too.

9 [SLIDE CHANGE]

10 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

11 JARZOMBK: Sharp is proposing a 6.2 percent increase from  
12 last year. This product was due -- introduced in 2021 and  
13 only has about 450 lives in it. The main cost driver is  
14 pharmacy, which Sharp administers, at eight percent, and  
15 it was mostly offset by a decrease in their medical of  
16 almost three percent. Just like Blue Shield's Medicare  
17 Advantage plan, Sharp is also facing the same volatility  
18 challenges as they are a relative new and small plan.

19 [SLIDE CHANGE]

20 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

21 JARZOMBK: UHC's group Medicare Advantage plan is a  
22 nationwide plan. UHC is proposing a 30 percent increase  
23 for next year. About nine percent of the premium increase  
24 is contributed to medical and 19 percent is to pharmacy.  
25 UnitedHealthcare is our second largest Medicare Advantage

1 Plan and has a stable population. For this plan too, we  
2 are establishing the premium stabilization fund to capture  
3 the difference between the announced drug subsidy minus  
4 the amount we assume in their final rate submission.

5 [SLIDE CHANGE]

6 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

7 JARZOMBK: UHC's Edge plan has a proposed premium  
8 increase of 50 percent from last year. This plan started  
9 in 2022 with \$0 copays for most services and now has over  
10 5,000 members. With United's proposed rate increase, Edge  
11 will go from being the fifth lowest cost Medicare plan to  
12 the most expensive Medicare Advantage plan we offer. This  
13 high premium set s a dangerous precedent. With such an  
14 unsustainable rate increase, we don't see this plan adding  
15 value to our program. Therefore, we recommend removal of  
16 Edge from the CalPERS Health Benefit Program.

17 Current Edge members can continue with the same  
18 Medicare providers as they are seeing by switching to  
19 another Medicare plan. For members who don't make a plan  
20 change later this year during open enrollment, they'll be  
21 administratively transferred to UHC's Group MA plan.  
22 Should the Board approve this recommendation, we will  
23 communicate this change to members through our open  
24 enrollment communications.

25 [SLIDE CHANGE]

1 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

2 JARZOMBEC: Western Health Advantage is no longer offering  
3 their MyCare Select Medicare Advantage plan in 2025. The  
4 decision applied to their Medicare book of business and  
5 not just to CalPERS. While this is disappointing, it is  
6 not surprising, as the landscape for MA plans has changed  
7 drastically since they'd introduced their plan just a few  
8 years ago. Western Health Advantage has sent letters to  
9 members about this last week and CalPERS will also  
10 communicate this to members, along with their options,  
11 through our standard open enrollment communications.

12 Blue Shield's MA plan will be the default for  
13 members who do not enroll in a new Medicare plan during  
14 open enrollment. UHC's Group MA plan will be the default  
15 plan for members in that Napa County.

16 [SLIDE CHANGE]

17 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

18 JARZOMBEC: Moving on to our Medicare supplemental plans.

19 --o0o--

20 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

21 JARZOMBEC: The average here is a 30 percent increase from  
22 last year. Again, the primary driver for this premium  
23 increase was pharmacy cost, due to the Inflation Reduction  
24 Act impacts.

25 [SLIDE CHANGE]

1 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

2 JARZOMBEEK: On this slide, we have the compilation chart  
3 of the proposed Medicare premiums for 2025. I'll note  
4 that if Edge were to remain in the portfolio, it would  
5 become most expensive Medicare Advantage plan we offer.  
6 It's shown here on the second bar from the left.

7 [SLIDE CHANGE]

8 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

9 JARZOMBEEK: For next steps, the CalPERS team will finalize  
10 the premiums and then present them at the Board off-site  
11 for your approval. Then we will communicate the final  
12 premiums in advance of open enrollment. This concludes my  
13 portion of the presentation and we're happy to take any  
14 questions

15 CHAIR RUBALCAVA: Thank you, Rob. We do have  
16 questions from the trustees. We'll start with President  
17 Taylor.

18 COMMITTEE MEMBER TAYLOR: Thank you. So I had --  
19 I guess my question right -- the first question is we're  
20 going to finalize premiums. Do you foresee anything  
21 coming down in between now and then?

22 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

23 JARZOMBEEK: There may be some slight changes to the  
24 pharmacy portion, just as we work through some of the  
25 assumptions more. But again, it will not be substantial,

1 so they should -- I anticipate them being largely  
2 similar --

3 COMMITTEE MEMBER TAYLOR: The same.

4 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF  
5 JARZOMBK: -- to what we have today, yes.

6 COMMITTEE MEMBER TAYLOR: Okay. So -- and  
7 then -- so the risk mitigation, if we move, rather than  
8 doing it two years, we're moving it into one year, that's  
9 the recommendation, correct? Because otherwise we won't  
10 have the funds. So okay. Not favorite thing to do.

11 CHIEF HEALTH DIRECTOR MOULDS: I should just --  
12 I -- our risk of not having funds goes up. And so we are  
13 not projecting to not have the funds under either  
14 scenario, but there is a risk, and it is significantly  
15 higher with the two-year transition versus the one-year  
16 transition.

17 COMMITTEE MEMBER TAYLOR: In case prices are  
18 higher. Okay.

19 Okay. And then I thought I'd mentioned, when I  
20 mentioned in closed session, the CMS benefit pharmacy  
21 change I think is confusing enough for everyone, not just  
22 the Board members, that we may want to cover that and how  
23 that has impacted pricing for us, which, you know, you get  
24 this good news on the news that our prices are going down  
25 for Medicare patients, et cetera, but then it impacts

1 health care rates overall. So if I had mentioned, and I  
2 think we did it as Board direction, that it would be a  
3 good idea to have some -- an educational session on this,  
4 so I just wanted to mention that.

5 CHIEF HEALTH DIRECTOR MOULDS: Yeah. And thanks,  
6 we'll take that as direction from the Board. I'll mention  
7 again that we are going out to bid on our pharmaceutical  
8 benefit manager in -- over the summer. We have been  
9 struggling with this question, not just because the  
10 changes at CMS are, I think the generous term is somewhat  
11 fluid, but also understanding better how we might adapt  
12 our own benefit to better take advantage of some of those  
13 changes. So it would be enormously helpful for us to  
14 bring experts in to go in depth about this, but also in  
15 our thinking about where we want to take our drug  
16 purchasing in this new solicitation.

17 COMMITTEE MEMBER TAYLOR: Yes. I think we -- it  
18 might give us some opportunities maybe.

19 CHIEF HEALTH DIRECTOR MOULDS: Agreed.

20 COMMITTEE MEMBER TAYLOR: I mean, I know  
21 there's concern over the pricing, so let's figure out what  
22 we can do to mitigate some of the concern.

23 And also, I just want to -- I'll state that while  
24 I understand these prices are high and I -- and they're  
25 not insignificant. So let's -- when I look at HMO prices,

1 which is most of my members, except for my out-of-state  
2 members -- David, sorry -- that 10 percent is 10 percent.  
3 You know, we don't have a 10 percent raise coming. We get  
4 a three percent raise. So this is -- I want to make sure  
5 that whatever we're doing hopefully mitigates future  
6 continuous increases. I mean, I know we're going to have  
7 increase, but I mean 10 percent is kind of high.

8 CHIEF HEALTH DIRECTOR MOULDS: Agreed. We're  
9 disappointed in them. We're -- the recommendations that  
10 we're making are to get to stability on the PPO side as a  
11 quickly as possible. That, on the basic side, is what is  
12 drying our costs this year. The base right on the HMO  
13 before the transitions is closer to six percent --

14 COMMITTEE MEMBER TAYLOR: Correct, yeah.

15 CHIEF HEALTH DIRECTOR MOULDS: -- which is below  
16 medical trend anationall. That's important. And tha's  
17 where we always want to be. So, yes, they're too high.  
18 This is the path that we believe will get us most quickly  
19 to single digits across the Board.

20 COMMITTEE MEMBER TAYLOR: Single digits for not  
21 just the HMO Basic, but the whole --

22 CHIEF HEALTH DIRECTOR MOULDS: For the PPO as  
23 well. That's -- that obviously is the goal. I mean, low  
24 single digits is -- low single digits is the goal, but  
25 certainly, you know, the short-term goal is to bring the

1 PPO down. The PPO will continue to see elevated costs, as  
2 long as that surcharge is in place. This also shortens  
3 the surcharge period from the five to six years to the  
4 probably about four-year period. We could see a little  
5 bit of relief in the fourth year.

6 COMMITTEE MEMBER TAYLOR: So that will be good.  
7 And then finally, I just want to reiterate, so that  
8 everybody heard, it was the UnitedHealthcare -- what's the  
9 name of that one?

10 CHAIR RUBALCAVA: Edge.

11 CHIEF HEALTH DIRECTOR MOULDS: Edge.

12 COMMITTEE MEMBER TAYLOR: Edge that we're  
13 getting -- we're not going to continue with or we're  
14 looking at not continuing.

15 CHIEF HEALTH DIRECTOR MOULDS: Well, we -- we're  
16 recommending that you would be taking action on that in  
17 July.

18 COMMITTEE MEMBER TAYLOR: Okay.

19 CHIEF HEALTH DIRECTOR MOULDS: Yeah.

20 COMMITTEE MEMBER TAYLOR: Okay. I just wanted to  
21 clarify.

22 CHIEF HEALTH DIRECTOR MOULDS: If you're so  
23 inclined.

24 COMMITTEE MEMBER TAYLOR: All right. Thank you  
25 very much.

1 CHAIR RUBALCAVA: Thank you, President Taylor.  
2 We'll continue with Trustee Pacheco.

3 COMMITTEE MEMBER PACHECO: Thank you, Chairman  
4 Rubalcava, and again, thank you, Rob, for your  
5 presentation. It was very, very thorough and I really  
6 appreciated that. And again, I want to thank your team as  
7 well.

8 My first question is actually more a broader  
9 question, in terms of the cost influencers and major  
10 trends. You mentioned that the medical inflation has  
11 increased the unit price as well as the continuing high  
12 pharmacy costs. And can you elaborate a little bit more  
13 on the increased unit price and where that's -- what's the  
14 driver behind that.

15 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF  
16 JARZOMBK: So, yeah, I'll have Dr. Albers come up and  
17 help out with the question. So we're seeing increased  
18 usage in high-cost specialty drugs and also brand name  
19 drugs. And so one thing that has happened over the past  
20 18 months or so is that some have -- there have been  
21 approved -- new indications have been approved for some of  
22 these high cost brand name and specialty drugs. And so  
23 there's -- and that means there's more utilization of  
24 those drugs, because they're being used for new things.  
25 And so this is where that we're seeing it happen and we're

1 seeing it happen on a regular basis. And there's more in  
2 the pipeline that's going to come down where we're having  
3 high cost drugs being used for new things.

4 So, Dr. Albers.

5 COMMITTEE MEMBER PACHECO: Thank you.

6 MEDICAL CONSULTANT II ALBERS: Sure. Mostly  
7 we're talking here about the pharmacy costs and not so  
8 much the medical costs. On the pharmacy side, as I think  
9 you're all aware, because it's always in the news, there  
10 have been a number of brand name drugs that have come out  
11 recently, particularly I know you've heard about the  
12 GLP-1s.

13 COMMITTEE MEMBER PACHECO: Um-hmm.

14 MEDICAL CONSULTANT II ALBERS: They are all over  
15 the news as treatments for weight loss, but actually they  
16 were originally developed for the treatment of diabetes,  
17 as I know you're aware, and they're very effective in the  
18 treatment of diabetes. So, the utilization of those drugs  
19 has increased quite dramatically in the past couple of  
20 years. And as Rob mentioned earlier, there have been  
21 changes in the guidelines that really make them first-line  
22 therapies for many patients who do have diabetes.

23 So that has contributed quite a bit to the  
24 increase in our pharmacy costs and that's happening across  
25 the nation. That's not unique to CalPERS in anyway.

1           Additionally, those drugs, while approved for  
2 weight loss by the FDA and for diabetes, they're getting  
3 new indications as well. So you may well have heard that  
4 recently Wegovy, which is one of the GLP-1s was approved  
5 not just for the treatment of diabetes or weight loss, but  
6 for a specific population of people who are at high risk  
7 of an adverse cardiovascular event like a stroke or a  
8 heart attack. If those individuals happen to have obesity  
9 or be overweight, then the FDA has approved the use of  
10 Wegovy to treat them.

11           So CalPERS is covering for that indication now,  
12 because it's not primarily for weight loss. It's for the  
13 prevention of an adverse cardiovascular event. And we  
14 anticipate that there will be other FDA indications coming  
15 down the road as well. So we'll evaluate each of those as  
16 they happen, but it's sort of a tsunami of new drugs and  
17 new indications that's been happening.

18           COMMITTEE MEMBER PACHECO: And that's what's  
19 driving the cost then, basically in that -- in that orbit,  
20 in that universe?

21           MEDICAL CONSULTANT II ALBERS: For pharmacy, yes,  
22 not just the GLP-1s but that's certainly a large part of  
23 it, but just again this wave of new medications that is  
24 coming.

25           COMMITTEE MEMBER PACHECO: Okay.

1 CHIEF HEALTH DIRECTOR MOULDS: Yeah. I'll add  
2 that, you know, the other -- the other piece of this is  
3 that we've -- you know, there are a number of drugs  
4 that -- and this is a -- this is a pharma technique, but  
5 evergreening their patents. And then when they get  
6 through the patents doing other things that I won't go  
7 into now, but happy to, at some point in the future --

8 COMMITTEE MEMBER PACHECO: Sure.

9 CHIEF HEALTH DIRECTOR MOULDS: -- maybe when we  
10 talk about drugs over the coming year, but make it less  
11 common or even less cost beneficial to transition to the  
12 generic substitute. So for some of the rheumatoid  
13 arthritis drugs and the bowel disease drugs, which are  
14 very expensive biologic interventions, we had anticipated  
15 seeing price relief when we had generics come online. And  
16 that has been much slower than we had hoped.

17 So there are a number of things that are  
18 happening, but at a very high level, you know, it is great  
19 that we come up with new pharmaceutical interventions.  
20 They are ridiculously priced and causing us grief and  
21 causing our members grief, the pricing that comes along  
22 with them.

23 COMMITTEE MEMBER PACHECO: Yeah, that's very  
24 interesting. Thank you for that question. My next  
25 question is on the HCF investments that are now fully

1 liquid due to the immediate cash needs. If you can  
2 elaborate, you mentioned that this is unique, a little bit  
3 more. And since we did something -- we did -- we changed  
4 the allocation of that yesterday, can you elaborate more  
5 no that?

6 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

7 JARZOMBK: Sure, so the -- it's unique in the sense that  
8 a fund of this -- a fund -- it's severely underfunded  
9 right now. And it's supposed to have more around the  
10 ballpark of four hundred to five hundred million dollars  
11 in it. And so when you have that much -- you have that  
12 much -- that large of a sum or that many -- that amount of  
13 money, then it's typically invested in other things other  
14 than liquid assets. And so because we're at -- we're in a  
15 position where we can't lose any more principal and don't  
16 want -- we just can't afford to lose any more principal,  
17 it needs to be in a much safer option. And so that's why  
18 we took -- the Investment team made the recommendation to  
19 officially move it into like a hundred -- a hundred  
20 percent liquidity.

21 COMMITTEE MEMBER PACHECO: Um-hmm.

22 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF

23 JARZOMBK: And so again, once it will come back up, which  
24 we hope it will come over the coming years, then we will  
25 look at what are the appropriate investment classes for it

1 to be invested in, so it's not just sitting there in cash,  
2 because we shouldn't need it in a cash -- in as much cash  
3 as we need it today. And so that will be evaluated once  
4 it is in a better position, a funded status position.

5 COMMITTEE MEMBER PACHECO: So it's going to be  
6 the cash equivalents, right?

7 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF  
8 JARZOMBK: It needs to be cash equivalents, in case we do  
9 happen to get higher claims coming through that we need to  
10 be able to pay. So we don't want it to be tied up in  
11 investments where we can't really get it out and have the  
12 potential to lose more of the principal.

13 COMMITTEE MEMBER PACHECO: Oh, I see then. Now,  
14 I understand the rationale why we want to go into the --  
15 into the single risk pool sooner than later in terms of  
16 trying to bring that back down to the single digit PPO  
17 increases moving forward.

18 The other question I have is -- just a comment  
19 actually on the Kaiser Permanente. You had mentioned  
20 Watsonville Community Hospital. And they -- and the  
21 Monterey Bay area. And can you just elaborate more on  
22 that outreach in your presentation?

23 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF  
24 JARZOMBK: So I know that everything is on track with  
25 them for -- to get the DMHC approval. They're still

1 working through all those things. The hospital they've --  
2 or they're contracting with is the Watsonville Community  
3 Hospital. I don't really have any more details than this  
4 at the moment, but we certainly pass those along once  
5 everything is hopefully approved. Again, Kaiser said they  
6 are very confident --

7 COMMITTEE MEMBER PACHECO: Yeah.

8 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF  
9 JARZOMBEC: -- that DMHC will approve this. So we expect  
10 that to be -- that happening for our members.

11 COMMITTEE MEMBER PACHECO: Well, as a point of  
12 privilege, I from Watsonville, born and raised and from  
13 there. And I -- and I -- and I actually was born in  
14 Watsonville Hospital, so I find it very interesting. And  
15 I also think it is a community that is very underserved.  
16 It's an agricultural community. The -- and very  
17 prominently Latino in -- and so it is -- it is -- it is  
18 really great that we are making that outreach in that that  
19 community, especially in that particular part of the  
20 Monterey Bay, Santa Cruz County area. So thank you for  
21 that comment.

22 HEALTH PLAN RESEARCH & ADMINISTRATION CHIEF  
23 JARZOMBEC: Thank you.

24 COMMITTEE MEMBER PACHECO: Those are my  
25 questions, sir. Thank you.

1 CHAIR RUBALCAVA: Thank you, Trustee Pacheco.

2 Now, we'll go to Vice Chair Palkki.

3 VICE CHAIR PALKKI: Thank you. Not so much a  
4 question, but really more of a comment. Watching these  
5 sort of percentages on the pharmacy side, where they --  
6 some are in the negative, some are in the -- in their  
7 extremes. And so it's frustrating to see those extremes  
8 and not quite understand what is happening to cause those  
9 extremes, but I am excited to hear that we are involved  
10 with these national councils, and hopefully we can use our  
11 voice to bring some awareness to some of those issues, so  
12 that we're really competitive when it comes to  
13 pharmaceuticals on a more global level. So thank you.

14 CHIEF HEALTH DIRECTOR MOULDS: No, thank you for  
15 that. And I'm -- you know, I'm really excited to -- in  
16 the same way I was excited about the PPO solicitation, I'm  
17 really excited about the PBM solicitation, because I think  
18 the options that exist in the world are more than they  
19 were the last time we took this up. And I want to bring  
20 the same spirit of innovation that went into the PPO work  
21 to the PBM work, because we need to be doing much better  
22 on pharmacy costs. It's -- they're driving increasingly  
23 higher percentage of our overall costs and I think we can  
24 be doing better for our members.

25 VICE CHAIR PALKKI: Thank you.

1 CHAIR RUBALCAVA: Thank you.

2 And I have Mr. -- Delegate Frank Ruffino for  
3 Treasurer Ma.

4 ACTING BOARD MEMBER RUFFINO: Thank you, Mr.  
5 Chair. I just have a quick question again about the  
6 proposed rate increases, right? And I want to premise the  
7 question too, that we'd recognize this is nothing unique  
8 to CalPERS. So even California, you know, the national  
9 this -- this is a national issue and we all struggle on  
10 what we need to do and what we're doing with health care  
11 rate.

12 But with the proposed rate increases for the  
13 Basic PPO and Medicare plans, can you maybe elaborate just  
14 a bit more on the strategies that are in place to mitigate  
15 the financial impact on our members, especially, you know,  
16 considering the high medical and pharmacy trends, and the  
17 significant premium increases projected for 2025?

18 CHIEF HEALTH DIRECTOR MOULDS: I can start.  
19 The -- you know, the big one is trying to stabilize the  
20 PPO as quickly as possible, which we've talked about and  
21 the redesign of the PPO that we brought earlier to -- you  
22 know, again, we're -- we have guaran -- total cost of care  
23 guarantees, quality guarantees built into that product  
24 that didn't exist prior. We are really optimistic about  
25 the ability of the new PPO to perform on the cost front,

1 because their fees are tied to their ability to hit  
2 really, frankly, aggressive have spending growth targets.  
3 So we are the first entity that I am aware of that has  
4 tied its -- any product to the Office of Health Care  
5 Affordability spending growth targets of three percent.  
6 That's much lower.

7 I mean, we're starting lower than where we have  
8 been historically, but we're ending much lower. And these  
9 are out there. And credit to Blue Shield for being  
10 willing to commit to that journey with us, but -- so, you  
11 know, this year, I don't have a great answer for you.  
12 We're trying to get these down as quickly as possible and  
13 a number of the recommendations, including the  
14 recommendation to transition to a single risk pool in one  
15 year versus two is to get this -- that product back into  
16 the normal range as quickly as possible.

17 ACTING BOARD MEMBER RUFFINO: Thank you. And I  
18 really appreciate that. And some of the things you just  
19 mentioned, you know, stabilize the PPO, the single risk  
20 pool and so on and forth. Great, I mean, it's -- how do  
21 we communicate? How do we make a better -- and this is  
22 not meant to criticize the process, but it's just -- the  
23 reality is that our average member out there, and I'm --  
24 and I'm not sure what kind of feedback you're getting from  
25 the stakeholders, but the reality is that it's hard to

1 understand, hard to comprehend about these specific. And  
2 I think the more we do to explain to our members and our  
3 stakeholders that we're not sleeping at the wheel so to  
4 speak. You know, we are really engaged and we're doing  
5 things that we are the first, as you just mentioned. I  
6 think the more we -- we perhaps should consider doing a  
7 lot more of that to -- I mean, in that communication space  
8 to explain.

9 CHIEF HEALTH DIRECTOR MOULDS: Yeah. No, I  
10 really appreciate the comment. We are and have heard  
11 similar comments. We're -- you know, Rob has talked  
12 through a lot of the communications strategy. We are open  
13 to other suggestions. When we were talking to the  
14 stakeholders about this, one of the things that I said is,  
15 look, you know, one of the stakeholders asked about the  
16 possibility of having CalPERS members do, you know, either  
17 virtual or in-person meetings with some of their members  
18 to help explain some of these changes, and what's behind  
19 them, and some of their -- some of the things that we're  
20 doing to mitigate the disruption, but also the general  
21 philosophy behind the product and what we're expecting to  
22 see in terms of quality improvement and reduction in  
23 overall costs. We are open to all of that.

24 We want to Make sure that we get the message out.  
25 We also want to hear back from our members. It's really

1 important, if this is not working for them, that we hear  
2 that. You know, when you do something big like this,  
3 there are always micro level -- hopefully micro level --  
4 micro level adjustments that you need to make on an  
5 ongoing basis to make sure this works. And the only way  
6 often we get those is either through our grievance  
7 procedure, which is certainly not how we want to get them  
8 or through communications with stakeholders and through  
9 stakeholder groups. So thank you for that.

10 ACTING BOARD MEMBER RUFFINO: Yeah, excellent.  
11 Thank you. Thank you for, you know -- you know, for your  
12 answer. I would really -- we'd really appreciate it.

13 Thank you, Mr. Chair.

14 CHAIR RUBALCAVA: Thank you, Mr. Ruffino. Now,  
15 let us hear from the stakeholders. So our next -- next  
16 we'll have public comment on this item and we'll start  
17 with Mr. Larry Woodson and followed by J.J. Jelincic.

18 LARRY WOODSON: The mic on?

19 CHAIR RUBALCAVA: Yes.

20 LARRY WOODSON: Good. Good afternoon. Larry  
21 Woodson CalPERS, retiree. Thank you for the opportunity  
22 to comment. I also thank the staff for the special  
23 stakeholders briefing where we were able to get a look at  
24 these outrageous preliminary rates, sharp and cancer --  
25 Kaiser excepted.

1           The Fortune 500 list was just released, and as  
2 I've done in past years, I want to point out to the Board  
3 your contracted health plans did quite well during the  
4 last year. Uniteedhealth Group once again was number five  
5 on the list with revenues of \$371 billion, over a 14  
6 percent increase over last year, and their profits  
7 increased to 22.3 billion. And again, they want large  
8 premium increases, 29 percent from Medicare Advantage.  
9 Anthem is now listed as Elevance on the list and they did  
10 quite well. They're 22nd. They did well in profits and  
11 in revenues and profits. Kaiser, though much smaller, did  
12 well as a non-profit, and they had profits of 4.1 billion.

13           These high premium increases against the backdrop  
14 of huge profits is just unacceptable. Please direct staff  
15 to go back and get them lower, especially the large  
16 increases.

17           I want to focus for a minute on Medicare  
18 Advantage in general as a huge driver of exorbitant costs.  
19 A new academic study in JAMA Internal Medicine details the  
20 enormous sums MA plans have cost taxpayers and the  
21 Medicare Trust Fund, and have called -- they've called for  
22 the Abolition of the program. They cite the non-partisan  
23 MedPAC study, which shows that MA plans have overcharged  
24 \$612 billion more since 2007 than traditional Medicare  
25 would have charged for the same service, and 82 billion

1 more just in the last year alone, much of that has to do  
2 with the capitation payment model. Only legislation can  
3 serve this problem, but CalPERS can say no to unreasonable  
4 premium increases.

5           Lastly, another major increase -- contributor to  
6 rising costs is the increasing acquisition of health care  
7 by private equity. It's -- this results in less  
8 competition, high cost, staffing reductions, poor quality  
9 care, little transparency. Yesterday, I sent to all of  
10 you a email requesting you to endorse AB 3121 -- 29, which  
11 would give some accountability and transparency, and allow  
12 Attorney General review. I hope you are able to read the  
13 email and consider endorsing this bill during Danny  
14 Brown's legislative update in your Board meeting tomorrow.

15           Thank you.

16           CHAIR RUBALCAVA: Thank you.

17           J.J. JELINCIC: J.J. Jelincic, beneficiary.

18           You are trustees of a Health Benefit Trust. You  
19 have a fiduciary obligation to the beneficiaries to limit  
20 medical costs and defend affordable benefits. You are  
21 elected public officials in California. You have an  
22 obligation to fight escalating costs and medical  
23 inflation. You are not fiduciaries to the State and  
24 public agencies, although you sometimes talk like you are.  
25 I also know that the desire of the State and public

1 agencies play a role in your decisions. They also want  
2 you to limit health care costs.

3           Given these obligations and employer concerns, it  
4 is unclear to me how you can defend your policy of  
5 rewarding beneficiaries who pick high-cost, inefficient,  
6 high premium plans, while punishing beneficiaries who pick  
7 efficient, low-cost, low-premium plans. And also, your  
8 policy of saying, well, if you're willing to accept the  
9 limitations of an HMO, we're going to raise your premiums  
10 to subsidize those who will not accept those risks or  
11 those limits.

12           It could be that these contradictions explain why  
13 you've entered into a contract with the trust fund to  
14 waive liability claims. It's not clear to me how those  
15 contracts do not violate Government Code section 1090, but  
16 the people responsible for enforcing the law, the Attorney  
17 General and the public -- and the district attorneys, have  
18 not asserted a violation, at least not yet.

19           Looking at the numbers, it's clear that the  
20 insurance companies have gotten the message, do not hold  
21 down costs or we will punish you. Unlike your  
22 regulations, risk should be -- risk adjustments should be  
23 made based on the health of the insured not on the risk of  
24 bad vendor negotiations.

25           I urge you to relook at your policy on how you do

1 risk adjustment. Thank you.

2 CHAIR RUBALCAVA: Thank you.

3 We also have two people on the phone for to  
4 speak. Three.

5 STAFF SERVICES MANAGER I FORRER: Yes, Mr. Chair.  
6 We have Karen Speckling. Go ahead, Karen.

7 KAREN SPECKLING: Hi. My name is Karen Speckling  
8 and I am a CalPERS member. I live in San Luis Obispo on  
9 the the central coast and work for the State.

10 And (clears throat) -- excuse me. I -- this  
11 comment may be tangential to this item, but it felt like  
12 the best fit for me. I had a few questions. I actually  
13 went to the benefits fair that you had in San Luis Obispo  
14 this weekend, and was actually recommended to come and  
15 just make my comments, and my questions, and concerns  
16 before you guys.

17 My main concern is that we have a lot of State  
18 and public workers in my area, at colleges, universities,  
19 State prisons, and hospitals, Caltrans, and where I work  
20 at the Water Board. We are really struggling with being  
21 able to maintain and retain quality physicians in our area  
22 due to expensive operating costs. As far as I've been  
23 able to ascertain by speaking to my providers why they're  
24 leaving the area or going private and not accepting any  
25 insurance is because their reimbursement rates are so low

1 that it is not economical for them to be able to operate  
2 in the area based on, as I understand, a rural status  
3 rate.

4 As many of you know, it's very expensive real  
5 estate here in San Luis Obispo and in our county. And I  
6 just didn't know if your Committee or anyone on staff has  
7 heard of this concern and this issue. It's really hard to  
8 find someone that's accepting new patients. I'm  
9 specifically on the PERS Gold PPO plan. And the wait time  
10 for most of the new -- the physicians that are accepting  
11 new patients for primary care, for example, is about a  
12 year and a half. And it's becoming quite burdensome for  
13 me, as someone who really needs the PPO, because of my  
14 medical history. I have a lot of specialists I see. And  
15 so, yeah, that's my concern, my comment.

16 Just a request that you guys consider maybe is  
17 there a way to adjust the reimbursement rates that the  
18 physicians get in our area through the existing contracts  
19 that you have or is there another provider -- I mean,  
20 another insurance option that we could have in our area  
21 that would maybe better serve us and or physicians and  
22 that's it. Thank you.

23 CHAIR RUBALCAVA: Thank you.

24 STAFF SERVICES MANAGER I FORRER: Next, we have  
25 John Willis to speak to Item 6a.

1 CHAIR RUBALCAVA: Please continue.

2 STAFF SERVICES MANAGER I FORRER: Go ahead, John.

3 JOHN WILLIS: Hi there. Yes. Good afternoon,  
4 everybody. John Willis, (inaudible). I was just trying  
5 to call in for the 2026 health plan. And it looks like  
6 that the 2025 is already -- almost (inaudible).

7 But I would appreciate for the 2026 health plan  
8 if we could look into the -- expanding the fertility  
9 services for members. You know, me and my wife are going  
10 through that and nothing is covered. I was just -- you  
11 know, it's a very challenging and stressful process to go  
12 through, obviously, very emotional as you could imagine.

13 But as, you know, a public sector employee, you  
14 can't afford the cost. And, you know, and I'm noticing  
15 the health plan we have, you know, there is some cost  
16 sharing with even doing the basic diagnostics, you know,  
17 the blood work, the exams, forget about doing the IVF or  
18 IU. That's my question. That's not covered.

19 So my recommendation is, if it's possible, for  
20 the health plans for 2026, if they are able to cover the  
21 diagnostics, right, and also maybe one session of the  
22 fertility services. I think that would be really, really  
23 appreciated. And it will help offset some costs, because  
24 it's really expensive. You know, here we are we're trying  
25 to, you know, be an advocate for reproductive rights. And

1 then on this side folks who are struggling to have a child  
2 cannot afford it.

3           And I'm realizing a lot of the, you know, large  
4 companies they actually offer fertile services as part of  
5 their benefits. And hopefully, you know, CalPERS has a  
6 huge pool of employees, maybe the health plans will be  
7 able to be a little bit more flexible in 2026 and expand  
8 their services or help reduce the cost for some of us, you  
9 know. And we're not that old. We're in our mid-thirties.  
10 So I would really, really appreciate that, because I'm  
11 looking into actually going into the private sector and  
12 leaving the public sector, because of this.

13           And I've noticed, there are some companies who  
14 are willing to do a hundred percent coverage for two  
15 sessions, which is really, really enticing. And I hope  
16 that, you know -- and it's very stressful to the  
17 employees, right, to go through this emotional process and  
18 then come to work. You know, there's now way you can turn  
19 that off as a human being. And top of that bills, the  
20 financial stress of all of that.

21           So it would be really, really helpful to do that.  
22 I did reach out to the Senate Public Employment Retirement  
23 Committee, also the Assembly committee and see if they  
24 could also look into this. But I would really, really  
25 appreciate if the staff could do some costing and bring

1 back -- bring that back to the Committee and see what  
2 those adjustments will look like, maybe, you know, health  
3 plans. But I would really really, implore you to -- if  
4 you guys could look into that. So thank you for your  
5 time.

6 CHAIR RUBALCAVA: Thank you for your comment.  
7 Next speaker, please. Next public comment.

8 STAFF SERVICES MANAGER I FORRER: Yes, Mr. Chair.  
9 We have David Aguinaldo for 6a. Go ahead, David.

10 DAVID AGUINALDO: Hello, everyon. Again, my name  
11 is David Aguinaldo of Chicago. Thank you for hearing my  
12 comments.

13 So for Agenda Item 6a, definitely see that the  
14 rates are increasing across the Board. And I wanted to  
15 speak on behalf of myself and out-of-state workers and  
16 those who, you know, need to be on the PPO, not because  
17 we're choosing the PPO, but because we must. I would  
18 highly support the proposal to full integrate the risk  
19 pool beginning in year 2025. I know last year when the  
20 decision was between two years and three years, I had  
21 advocated for the two years at that point. That was not  
22 heeded and we're in the exact situation that I assumed we  
23 would be in, where we're continuing to lose numbers. So  
24 we need to make sure that (inaudible). So I firmly want  
25 to say I'm in favor of it.

1           A second point I want to make is the continued  
2 struggle with affordability. Even with the movement to  
3 the single risk pool, the plans -- the PPO plans, again  
4 all of the numbers that are used in these presentations  
5 are the full cost. The full cost is very helpful on the  
6 CalPERS end, but on the employee side, what we care about  
7 is what's coming out of our paycheck every month. And so  
8 just to give you an example. With a one-year phase-in, so  
9 everything going in in 2025, our lowest paid office  
10 worker, who gets paid \$5,000 a month, will be paying \$834  
11 a month for her premiums alone before any care is  
12 received. So before any care is received, that's 17  
13 percent of her paycheck out the window.

14           So if that tells you, you know, just how -- just  
15 how important this continues to be, I really hope that,  
16 number one, you move to that one-year risk pool. And what  
17 we really need is we need some very creative thinking,  
18 because I feel a lot of the ideas that are coming forward  
19 are tried and true methods. But these tried and true  
20 methods aren't getting us anywhere. We need to start  
21 thinking a lot more radically about what changes can be  
22 made. A lot of talk has been made about the increased  
23 cost of prescription medications this year due to GLP-1  
24 antagonist, the semaglutides, all of that stuff.

25           CalPERS represents so many people. What doesn't

1 make sense to me and many others is why CalPERS is not  
2 flexing the power that we have. When I talk about, you  
3 know, just off the -- like what else can we do? See what  
4 we can do to try to do things differently. What if  
5 CalPERS set up their own manufacturing facility for  
6 prescription drugs? I know that sounds silly, but CalPERS  
7 has got a lot of money, and we need a lot of prescription  
8 drugs. And if they're not making it, I know that the  
9 Governor put out, you know, manufacturing insulin in the  
10 state of California. Why don't we do things like that?  
11 We have the resources.

12 So I just want to say like let's start flexing  
13 the power that exists within CalPERS, within the State of  
14 California employees, and with (inaudible). We need to  
15 get these health care costs (inaudible). And I stand  
16 with, you know, some of the former comments that were made  
17 that these health care companies are making insane  
18 profits, while at the same time having these massive  
19 (inaudible) that are causing our providers to not get paid  
20 for months and months and yet we're still in --

21 CHAIR RUBALCAVA: David, can you please start --  
22 David, you've got to start ending your statement,  
23 please.

24 DAVID AGUINALDO: Okay. So all of that, my  
25 number one thing is one-year phase-in. Thank you,

1 everybody, for listening.

2 CHAIR RUBALCAVA: Thank you.

3 I want to thank all the public commentators --  
4 public comments. We don't -- it's not our practice to  
5 always respond, but please understand that we do listen  
6 and staff -- we are working on some of those issues  
7 actually. So thank you very much. I think we should take  
8 a 10 -- a break for the reporter now, a 15-minute break,  
9 please.

10 Thank you.

11 (Off record: 3:01 p.m.)

12 (Thereupon a recess was taken.)

13 (On record: 3:16 p.m.)

14 CHAIR RUBALCAVA: Good afternoon, we're  
15 reconvening the Pension and and Health Benefits Committee.  
16 And we're going to proceed with Item 6b, informational  
17 agenda item, the prospective Long Term-Care Program rates,  
18 Don Moulds and Jared --

19 CHIEF HEALTH DIRECTOR MOULDS: Just -- yep.  
20 Thanks, Mr. Chair. The purpose of this agenda item is to  
21 share our intent to bring to the Board in September a  
22 proposal to raise rates for the Long-Term Care Program  
23 starting in January of next year. Based on the valuation  
24 report you heard in April, we believe that two rate  
25 increases will be necessary, a 10 percent rate increase

1 starting in 2025, and a second 10 percent increase in  
2 2026. Combined, the two rate increases are projected to  
3 restore the Long-Term Care Fund to fully funded status.

4 I want to assure the Board and those listening  
5 that we do not take these rate increases lightly. While  
6 they are significantly lower than the last two series of  
7 rate increases we've needed to do, we recognize that they  
8 will create hardship for our Long-Term Care Policy and  
9 program enrollees.

10 Nonetheless, CalPERS has an obligation to ensure  
11 that the health of the Long-Term Care Fund is sufficient  
12 to meet the needs of its program participants into the  
13 future. Since the last rate increase, there are two  
14 considerations that are contributing to the need to raise  
15 rates. The first is a material change to our projections  
16 of our enrollees' future long-term care needs. Following  
17 industry standards, CalPERS annually reviews and makes  
18 improvements to the actuarial assumptions that are used to  
19 calculate the projections about future obligations. They  
20 apply these new assumptions to what we know about our  
21 current program enrollees.

22 In April, our Actuarial Office presented their  
23 latest reports using data as of June 30th, 2023, the last  
24 valuation cycle. The report stated that both claim  
25 incidents, how many people will go into claim and claim

1 termination, how long claims will last, required upward  
2 adjustments. These updates were used as a base -- as  
3 baseline assumptions and then adjusted to reflect the  
4 program's experience. Both are putting upward pressure on  
5 our rates.

6 The other factor that is contributing to the need  
7 to raise rates is worse than expected investment returns.  
8 Followed -- following a period of historic increases in  
9 interest rates, return on our investments of the Long-Term  
10 Care Fund, which are heavily exposed to the U.S. bond  
11 market, have significantly underperformed. For the  
12 2021-2022 year, investments in the Long-Term Care Fund  
13 realized nearly a 10 percent loss, and for 22-23, they  
14 realized a loss of sixth-tenths of one percent.

15 As a reminder, the assumed rate of return on the  
16 portfolio is 4.75 percent. And while returns are  
17 projected to be positive for the year ending in a few  
18 weeks, and the prognosis for coming years is optimistic,  
19 poor performance during the two-year period necessitates  
20 an adjustment.

21 It's important to note that the entire long-term  
22 care industry has been facing the same challenges that our  
23 program is currently facing. In many cases, it has seen  
24 premium increases that are significantly higher than the  
25 ones we will be proposing in September. We recognize that

1 CalPERS policyholders have experienced prior rate  
2 increases. To bring the program back to being fully  
3 funded, the 10 percent increase would be phased in over  
4 two years beginning, as I said, in 2025.

5 We believe that it is imperative that we make  
6 these adjustments now. With the average age of a program  
7 participant currently about 77 years old, over the next  
8 few years, we're going to see high number of enrollees  
9 transition from being premium payers to being claimants.  
10 Recall, if you will, that enrollees stop paying premiums  
11 once they go into claim. What that means is that the  
12 burden of any potential future rate increases will be  
13 assumed by a smaller group of program participants. So  
14 failing to raise rates when necessary now will result in  
15 higher needed rate increases in the future.

16 We will be coming back to the Board in September  
17 with a detailed plan for these -- for the rate increases,  
18 including timing, the exact amount of the premium  
19 increases, and our plans for communications to  
20 policyholders and other key stakeholders.

21 Again, my purpose today is to inform you of where  
22 the program stands and of what our recommendations will be  
23 going forward. Fritzie Archuleta from the Office of the  
24 Actuary and Christine Reese from the Investment Office are  
25 here with me. Any of us are happy to answer any questions

1 you might have.

2 CHAIR RUBALCAVA: We do have questions.

3 Trustee Pacheco.

4 COMMITTEE MEMBER PACHECO: Yes. Thank you.

5 Thank you, Rob, for your questions. And I'd like to ask a  
6 few questions, more -- I have actually more of a basic  
7 question understanding. From the five-year history of the  
8 funded status and margin, as of June 30th, 2023, the  
9 funded status is 90 percent. And about two years ago at  
10 June 30th, 2021, it was 108 percent. I just want to  
11 understand, for my understanding, because at that time in  
12 2021, the margins were 10.51 percent, but currently now  
13 it's at negative 19.01 percent. To clarify the -- this  
14 issue that's going on -- because from a lays perspective,  
15 the funded status is at such a rate that I don't  
16 understand the rationale of the increase. So can you  
17 please elaborate that with respect to the investment side?

18 INVESTMENT DIRECTOR REESE: Yes. From the  
19 investment side, what you're seeing when the funded status  
20 was over a hundred -- I believe it was 108 percent --

21 COMMITTEE MEMBER PACHECO: Um-hmm.

22 INVESTMENT DIRECTOR REESE: -- we had just come  
23 off -- we had just off of three positive investment years.  
24 We had earned seven percent, four and a half, and then  
25 almost 13 percent over the three-year prior period. The

1 following year, we -- it was a negative 10 percent  
2 investment earning. And then the year after that ending  
3 in 2023 was pretty much flat at about negative 0.6  
4 percent. So those two years are what's contributing to  
5 the funded rate going down below 100 percent. And I'll  
6 let Fritzie add some actuarial information.

7 COMMITTEE MEMBER PACHECO: Okay.

8 DEPUTY CHIEF ACTUARY ARCHULETA: Hi. Fritzie  
9 Archuleta, Actuarial team. So to add to Christine's  
10 comments on the actuarial side, every time we do a  
11 valuation for the Long-Term Care Program, we have to make  
12 assumptions about the future, as far as the demographics  
13 go. And the projections, the demographic projections  
14 going forward have actually gotten worse. You heard Don  
15 said that, you know, the claims are expected to last  
16 longer and maybe be more expensive. And so on that front,  
17 that's why the costs have gone up on that side. So I  
18 would say that if you are looking at, you know, the total  
19 loss altogether, two-thirds of that is probably the  
20 investment side and the rest of it is the experience, the  
21 demographic experience.

22 COMMITTEE MEMBER PACHECO: And with respect to  
23 that, I mean, in the report, it also stated that the  
24 rising interest rates environment that we're in has  
25 contributed to the market value -- the decline in the

1 market value of the -- of the fixed assets. Now, if  
2 situations change or the economy changes and those  
3 interest rates begin to fall again, then it's -- I would  
4 imagine it's presumably the -- there would be the inverse  
5 of the value -- that valuations would go up, but if you  
6 guys could elaborate on that.

7 INVESTMENT DIRECTOR REESE: Yes, that's correct.  
8 So if interest rates go down, we would expect the value of  
9 the investments to go up. So as you say, it would be the  
10 inverse situation that we've experienced. I do want to  
11 also say that so for fiscal year ending in 2022, it wasn't  
12 just the fixed income assets that were negative. It was  
13 on the equity side as well. And so it was just a  
14 particularly bad year for the entire market, both on the  
15 equity side and fixed income.

16 COMMITTEE MEMBER PACHECO: Okay. And then  
17 yesterday, I think I asked the question regarding the --  
18 you know, considering with respect to the affiliated  
19 funds, which is --

20 INVESTMENT DIRECTOR REESE: Um-hmm.

21 COMMITTEE MEMBER PACHECO: -- this is included as  
22 part of the affiliated funds, to -- perhaps if there's  
23 something on the roadmap in place to consider additional  
24 asset classes for the entire affiliation -- affiliated  
25 funds, I mean, perhaps this may be an area of exploration

1 or is it being explored?

2 INVESTMENT DIRECTOR REESE: The Long-Term Care  
3 Fund would be included as part of that exploration  
4 absolutely.

5 COMMITTEE MEMBER PACHECO: Okay. Very good then.  
6 That's all my answers -- questions, sorry. Excuse me.  
7 Thank you.

8 INVESTMENT DIRECTOR REESE: Thank you.

9 CHAIR RUBALCAVA: I see no more questions from  
10 the Committee.

11 No. I think we're all going to wait till we see  
12 the proposal.

13 So at this point, we'll go into public comment.  
14 I have Mary Brown, please.

15 MARY BROWN: As a long-term care policyholder, I  
16 appreciate the LTC agenda item and 70-page presentation on  
17 the program and fund status, but I'm very concerned about,  
18 one, deficiencies in the presentation, two, the fund's  
19 poor investment returns, and three, the staff's proposal  
20 to raise premium rates by 10 percent in each of the next  
21 two years.

22 First, the presentation is deficient. The LTC  
23 presentation reflects the conditions at the end of last  
24 June almost 12 months ago. While that time frame may be  
25 customary, the 70-page report and this agenda item

1 completely ignore the impact of the Wedding settlement --  
2 Wedding lawsuit settlement approved less than a month  
3 later, and that impact was seismic costing the fund \$744  
4 million and resulting in 10,441 policyholders withdrawing  
5 from the program, a 10.5 reduction in enrollment.

6 The presentation details at length hypothetical  
7 impacts of changes to mortality, recovery rates, et  
8 cetera, while ignoring the elephant in the room, the  
9 impact of the Wedding settlement, which is already a  
10 reality.

11 At a minimum, providing a year old assessment  
12 without the larger context is ill-advised and it feels  
13 disingenuous. Before considering rate increases, the  
14 Board and the public need an updated assessment that  
15 reflects the pivotal Wedding settlement impacts that are  
16 now more than 10 months old.

17 Also, please note that the lapse section of the  
18 assessment, page 56, is particularly deficient. It claims  
19 to reflect data through 6-30-2023, but quote excludes data  
20 after 12-31-2020, and for any year in which premium rates  
21 increased. This feels like very selective data usage.

22 Two, dismal investment returns. During the 22-23  
23 year, CalPERS earned 6.1 percent investment return for the  
24 Public Employees' Retirement Fund, which is great, but  
25 lost money on the Long-Term Care Fund for the same period.

1 How is that -- how does that happen, especially given the  
2 exceptional skill and experience of the CalPERS Investment  
3 staff. Is the Long-Term Care Fund a low investment  
4 priority, are there legal or policy obstacles to the fund  
5 utilizing a more successful investment portfolio, as was  
6 just mentioned by member Member Pacheco.

7 Before allowing poor investment returns to  
8 trigger rate hike discussions, it's incumbent on this  
9 Board to focus on removing all impediments to successful  
10 investment of this fund's assets.

11 Three, as just mentioned, a 10 percent annual  
12 premium increase is huge. Since I enrolled, the cost of  
13 my inflation protected LTC premiums has increased from 0.8  
14 percent of my gross income to currently 6.7 percent, as  
15 they have for most LTC policyholders. If our premiums  
16 continue to rise, especially by 10 percent per year, while  
17 our pensions increase by no more than two percent  
18 annually, we are sitting ducks as the LTC costs eat into  
19 our fixed income. High premiums will eventually force us  
20 to drop out of the LTC Program due to unaffordability just  
21 when we become the most likely to need it.

22 Beyond unfair, this feels intentional, akin to  
23 the shock-lapse tactics called out by the judge in the  
24 Wedding settlement. With 10 percent increases each year,  
25 I will pay 13 percent of my entire pension by the time --

1 for LTC costs by the time I reach age 70, and 30 percent  
2 of my income by the time I reach 81 percent, and 30  
3 percent is cited as the upper limit on what people should  
4 spend for their housing.

5 Thank you.

6 CHAIR RUBALCAVA: Thank you very much. We also  
7 have a caller on this item.

8 STAFF SERVICES MANAGER I FORRER: Thank you, Mr.  
9 Chair. We have Bobby Roy. Go ahead, Bobby.

10 BOBBY ROY: Hello. Good afternoon, Committee  
11 members. My name is Bobby Roy. And I am a Long-Term Care  
12 Program enrollee.

13 I've been paying my long-term care policy in  
14 2013, when I, at the age of 26, found myself a single only  
15 child, realized that I had nobody to take care of me, like  
16 I -- if I were to get sick the way that my mom, my  
17 grandmother, and uncle had me to take care of them under  
18 the IHSS program.

19 My initial premium then was \$134.97 per month.  
20 Today, at the age of 45, not the 70 plus that Mr. Moulds  
21 talk about, pay \$256.42 a month. And doing -- and doing  
22 some back of the envelop calculations, the proposed  
23 increases will raise my rates to \$310.27 per month in a  
24 time when more people are more and more price sensitive  
25 due to growing inflation.

1           There is a huge concern for me that I will not be  
2 able to retain this long-term care policy due to the cost  
3 and that I'll have to disenroll, you know, and not fall  
4 under the sunk cost falacy, but realize that I had  
5 coverage while I could. But if I can no longer afford it,  
6 and I need to pay for other things, that I'll have to get  
7 rid of this. I know that I would not be the only one that  
8 would be facing this. And I think that this is a reality  
9 that we are potentially going into a death spiral with the  
10 Long-Term Care plan, unless some creative thinking is  
11 applied to this situation.

12           Thank you.

13           CHAIR RUBALCAVA: Thank you very much for your --  
14 expressing your concern.

15           That concludes the public comment on this item.

16           So now, we'll go to the summary of Committee  
17 direction.

18           CHIEF HEALTH DIRECTOR MOULDS: Mr. Chair, I have  
19 two directions. The first is to provide regular Board  
20 updates on the implementation of the PPO, and in  
21 particular on the disruption mitigation efforts that are  
22 starting almost immediately. And the second is to bring  
23 the Board a discussion presumably involving outside  
24 experts of the changes, both through CMS and through the  
25 Inflation Reduction Act, that are impacting drug prices

1 with an eye towards looking at how we can rethink our drug  
2 benefit to better position ourselves going forward under  
3 those new changed rules.

4 CHAIR RUBALCAVA: Thank you, Mr. Moulds. That's  
5 what I have too.

6 Thank you. Now, we'll go into public comment.  
7 We have Tim Behrens.

8 TIM BEHRENS: Chairman Rubalcava, members of the  
9 Committee, Tim Behrens, California State Retirees. I want  
10 to start with a thanks to Don and the Health Care team at  
11 CalPERS for spending over an hour with us going over their  
12 proposals they made today to you all and tomorrow to the  
13 Board. It's a good first step that hasn't been done in  
14 the past, a month in advance from what's been done in the  
15 past. And it's going to help us a lot, and we're going to  
16 bombard Don with other crazy ideas that we can come up  
17 with in communicating with our members on the increase in  
18 the different things that we're talking about.

19 So I also have requested -- and I couldn't hear  
20 when Larry talksed whether he talked about AB 236, Holden,  
21 and asking the Committee and the Board to consider  
22 endorsing this. I'm not going to be here tomorrow, so I'm  
23 going to ask you today. AB 236 would require health plans  
24 and insurers to annually update their provider directors  
25 to ensure accuracy when patients seek care. This bill

1 would also protect enrollees and insured individuals who  
2 receive surprise bills after being provided inaccurate or  
3 misleading information contained in a health plan or  
4 policy provider directory.

5           So I'd like you all to take a look at that and  
6 consider it.

7           (Coughing.)

8           TIM BEHRENS: Excuse me.

9           ACO REACH, we talked about this last week at the  
10 stakeholders meeting and what I thought were just some  
11 kind of advertisements turned out that California is now  
12 being inundated with ACO REACH being implemented. So my  
13 question for CalPERS is what, if any, impact will this  
14 have on CalPERS and their interaction with Medicare and  
15 providing us with the Medicare statements that we get  
16 right now. I don't know that it will impact it at all,  
17 but it's a question.

18           Single risk pool, good idea. Go for it.

19           Long-Term Care increased by 10 percent, bad idea.  
20 You're talking about people in their sixties that still  
21 are hanging on to their long-term care plans, like the  
22 gentleman on the phone, and maybe the lady before him, on  
23 a fixed income, you can't do it. It's just not doable.  
24 People have held on to it, even though they had a chance  
25 to cash it out, because they're at an age when they're

1 probably going to be using it. And hopefully they can  
2 start using it before the 10 percent increase happens.  
3 But not a good idea. It's not -- it's going to be very  
4 painful for a lot of stakeholders.

5 Thank you.

6 CHAIR RUBALCAVA: And thank you, sir.

7 That concludes public comment and I call for --  
8 this adjourns the meeting. Thank you, everybody.

9 (Thereupon California Public Employees'  
10 Retirement System, Pension and Health Benefits  
11 Committee open session meeting adjourned  
12 at 3:38 p.m.)  
13
